**The Number Line through Guided Inquiry** David M. Clark,Xiao Xiao,2021-12-10 The Number Line through Guided Inquiry is designed to give future secondary teachers a deep understanding of the real numbers and functions on the reals By presenting just that part of the subject that underlies the high school curriculum this book offers an alternative to a standard real analysis sequence for advanced undergraduate or beginning graduate students It will give any student a much deeper understanding of the mathematics that they were taught in high school Written in a guided inquiry format this book consists of a carefully scaffolded sequence of definitions problems and theorems that guides students through each topic Readers solve the problems and prove the theorems on their own and present their results to their peers with the instructor as a mentor and a guide Students will learn not only the mathematics but also how to help others learn mathematics They will learn to think creatively and to make compelling arguments to justify their conclusions They will learn to listen critically to others and give constructive feedback Ultimately they will learn to work as a team to answer the bigger questions and build a common understanding of the broader subject Math Instruction for Students with Learning Difficulties Susan Perry Gurganus,2021-11-29 This richly updated third edition of Math Instruction for Students with Learning Difficulties presents a research based approach to mathematics instruction designed to build confidence and competence in preservice and inservice PreK 12 teachers Referencing benchmarks of both the National Council of Teachers of Mathematics and Common Core State Standards for Mathematics this essential text addresses teacher and student attitudes towards mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors Chapters on assessment and instruction precede strands that focus on critical concepts Replete with suggestions for class activities and field extensions the new edition features current research across topics and an innovative thread throughout chapters and strands multi tiered systems of support as they apply to mathematics instruction **Math Practice, Grades K - 1** ,2009-01-19 Help students in grades K 1 master the skills necessary to succeed in math using Math Practice This 128 page book allows for differentiated instruction so that each student can learn at his or her own pace It is perfect for extra practice at home or school and includes more than 100 pages of exciting activities The activities cover skills such as counting sequence number words addition telling time shapes and patterns The book includes 96 durable flash cards and an award certificate **Approaches to Qualitative Research in Mathematics Education** Angelika Bikner-Ahsbabs,Christine Knipping,Norma Presmeg,2014-11-26 This volume documents a range of qualitative research approaches emerged within mathematics education over the last three decades whilst at the same time revealing their underlying methodologies Continuing the discussion as begun in the two 2003 ZDM issues dedicated to qualitative empirical methods this book presents astate of the art overview on qualitative research in mathematics education and beyond The structure of the book allows the reader to use it as an actual guide for the selection of an appropriate methodology on a basis of both theoretical

depth and practical implications The methods and examples illustrate how different methodologies come to life when applied to a specific question in a specific context Many of the methodologies described are also applicable outside mathematics education but the examples provided are chosen so as to situate the approach in a mathematical context [Queensland Targeting Maths: Teaching guide](#) Garda Turner, Gloria Harris, Robyn Hurley, 2004

[Mine the Gap for Mathematical Understanding, Grades K-2](#) John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about

next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it is the gap in their understanding today that holds the secrets to planning tomorrow's best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K 2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It is time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see *Beyond the Bubble* Maryann Wickett, Eunice
