Number Talk

Subject: Mathematics

Objectives:

- Using number talks children will be:
- (i) Confident in solving math problems.
 - (ii) Gradually speed up in calculations.
 - (iii) Be more flexible to reach mathematical solution

Lesson Plan:

Number talk is nothing but discussions over numbers. It helps children to grow confident with numbers and not feel anxious. It helps them to think, visualize, be flexible in using mathematical strategies and reach the end result of a problem via multiple ways rather one!

Exposing children to this earlier in life helps them to become more comfortable and have fun with numbers rather than feeling all confused. They also feel encouraged to justify and explain their stance on how they got to the end result.

The best part of number talks or math chats is that it does not have to be structured! For a beginner, start with basic conversations or discussions. for example, ask a child "If I add 5 and 7, what will be the total of it? the child will say the answer 12.

Now, ask them is there any other way we can get the answer 12, by adding, subtracting any other two numbers? (they may answer: $6+6$; $3+9$; $15-3$, and so on.) Help them by giving examples if they are unable to.

Alright after leading the conversation in this direction, we move forward to some of the techniques that can be used:

Leading from the Trenches Stephen V. Newton, 2018-10-16 School leaders know that instructional leadership is a crucial aspect of education However many of those leaders lack the knowledge and credibility to lead this work Leaders must be empowered to enter into and guide instructional conversations while building leadership capacity of their teachers in the process It is easy for administrators to get caught up in the daily managerial tasks of running a school Passionate educators become principals however to make a positive impact on the classroom opportunities and experiences of young people Because principals may not be experts in all areas of instruction they must develop their own skills to become genuine participants in instructional conversations However the task of a true

leader is also to develop the leadership capacity of those around them to ensure that best practices are embraced in all classrooms. The most important and consequential work in schools is happening in the trenches. Principals must commit to join their teachers in that space. With these new skills and a renewed commitment to genuine instructional leadership, administrators can work collaboratively with teachers to transform the educational experience of all students.

Hands Down, Speak Out Kassia Omohundro Wedekind, Christy Hermann Thompson, 2023-10-10. Math coach Kassia Omohundro Wedekind and literacy coach Christy Hermann Thompson have spent years comparing notes on how to build effective classroom communities across the content areas. How they wondered, can we lay the groundwork for classroom conversations that are less teacher directed and more conducive to student to student dialogue? Their answers start with Hands Down Conversations, an innovative discourse structure in which students' ideas and voices take the lead while teachers focus on listening and facilitating. In addition to classroom stories and examples, Christy and Kassia provide 28 micro lessons designed to help K-5 students develop and exercise their speaking and listening muscles. Inside Hands Down Speak Out, you'll learn how to build talk communities that are accessible to everyone, especially those whose voices are often traditionally left out of classroom discourse. Analyze classroom conversations in order to plan next steps for developing the classroom talk community. Plan and facilitate three types of conversations across literacy and math. Christy and Kassia believe that the development of dialogue skills is worth the investment of time, not only because it has the power to deepen our understanding of literacy and mathematics, but also to deepen our understanding of ourselves, our communities, and the world.
