 time during which doctors practiced without many of the problems that face modern physicians forms to complete for every

 Medicine is alive and well in the United States The base of this medical specialty has traditionally been in the smaller cities
 suburban communities and rural areas of this country Over the past decade however there has been a resurgence of interest
 in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care
 environment A rebirth of urban family medicine has accompanied these pioneering efforts To date the accomplishments are
 substantial and the prospects are bright There is still a long way to go and there are a significant number of hurdles to cross
 Although diseases are generally the same wherever you are their effects as illness on the individual and the family are
 strongly influenced by the environment and social milieu Urban families have distinctive and diverse problems cultural
 economic and ethnic Training programs situated in the large cities must recognize these issues and include special emphasis
 on the situations that the family physician is likely to encounter during and after his training There is very little research
 literature on the background and nature of special urban problems and these areas are the subject of several chapters of this
 long overdue volume devoted specifically to urban family medicine Dr Birrer has persuaded true experts to share their
 knowledge with the reader Primary Care Geriatrics Richard J. Ham,2007-01-01 Accompanying CD ROM contains video
