I. Patient Information

Category	Details	
Name:	John Doe	
Age:	58 years old	
Medical Record Number:	MRN123456	
Room Number:	305	

II. Summary of Condition

A. Patient's Current Status

As I finish my shift, John Doe is recovering well post-surgery following a total hip replacement performed two days ago. He is currently pain-free at rest and rates his pain at 2/10 during movement. John is compliant with physical therapy sessions and has been ambulating with a walker. His vital signs are stable and within normal limits.

B. Changes Since Last Report

Since my last report, John Doe's pain management regimen was adjusted from intravenous to oral acetaminophen (1000mg PO every 6 hours as needed) due to improved pain control and oral intake. He is now tolerating a regular diet and has had no nausea or vomiting. The wound dressing was changed earlier today, and the incision site remains clean and dry without signs of infection.
