

# SAMPLE STATEMENT OF PURPOSE NURSE PRACTITIONER

When one of my relatives fell sick, I remember how my life changed as everyone in the family pitched in to help provide care. At first, I thought it would be a nuisance, but then I discovered that I really enjoyed providing care to others and being able to form strong relationships. Through this experience, I became interested in pursuing a career in the nursing field. This nurse practitioner program will give me the training and knowledge that I will need to turn my dream into a reality, allowing me to bring comfort and care to my future patients.

For the past five years, my interest in nursing has led me to work as a nursing assistant, where I am able to work directly with patients and form strong relationships with them and their families. Through visiting them every day to check their vitals and administer their daily medications, I have been able to learn much about the medical field and what each symptom indicates. Working with nurses and nurse practitioners have also shown me how diverse their roles can be in a healthcare setting. Through this experience, I have come to gain new appreciation for nurse practitioners and the work that they do each day to ensure the health and wellness of their patients.

Becoming a nurse practitioner would open up new opportunities for me, allowing me to expand my roles in a clinical setting and allowing me to diagnose and treat certain conditions. Through this nurse practitioner program, I hope to learn more about human biology and pathophysiology, allowing me to provide basic care and health directives for patients. Additionally, I will gain practical experience in the clinic administering different tests and interpreting results. The skills that I will gain through this nurse practitioner program will allow me to enhance my career and provide excellent medical care for my patients in the future.

Saaty,Luis G. Vargas,2012-12-06 Models Methods Concepts and Applications of the Analytic Hierarchy Process is a volume dedicated to selected applications of the Analytic Hierarchy Process AHP focused on three themes economics the social sciences and the linking of measurement with human values 1 The AHP offers economists a substantially different approach to dealing with economic problems through ratio scales The main mathematical models on which economics has based its quantitative thinking up to now are utility theory which uses interval scales and linear programming We hope that the variety of examples included here can perhaps stimulate

researchers in economics to try applying this new approach 2 The second theme is concerned with the social sciences The AHP offers psychologists and political scientists the methodology to quantify and derive measurements for intangibles We hope that the examples included in this book will encourage them to examine the methods of AHP in terms of the problems they seek to solve 3 The third theme is concerned with providing people in the physical and engineering sciences with a quantitative method to link hard measurement to human values In such a process one needs to interpret what the measurements mean A number is useless until someone understands what it means It can have different meanings in different problems Ten dollars are plenty to satisfy one's hunger but are useless by themselves in buying a new car Such measurements are only indicators of the state of a system but do not relate to the values of the human observers of that system AHP methods can help resolve the conflicts between hard measurement data and human values
