Nwea Map Cut Scores Spring 2014 Illinois:

Same as It Never Was Gregory Michie, 2019 After a decade as an education professor Greg Michie decided to return to his teaching roots He went back to the same Chicago neighborhood the same public school and the same grade level and subject he taught in the 1990s But much had changed both in schools and in the world outside them *Same As It Never Was* chronicles Michie's efforts to navigate the new realities of public schooling while also trying to rediscover himself as a teacher Against a backdrop of teacher strikes and anti testing protests the movement for Black lives and the deepening of anti immigrant sentiment this book invites readers into an award winning teacher's classroom as he struggles to teach toward equity and justice in a time where both are elusive for too many children in our nation's schools Michie's volume brings us back to the reality of public school teaching From the Foreword by Gloria Ladson Billings University of Wisconsin Madison Teachers will love this beautiful book and anyone who cares about the future of our democracy Sonia Nieto professor emerita University of Massachusetts Amherst Michie helps us to see the successes tensions shortcomings and triumphs in his own classroom and community so that we may see the extraordinary possibility of the work to be done in ours Cornelius Minor educator and author *Honest and compassionate* Edwin Mayorga Swarthmore College *Linking the PARCC Assessments to NWEA MAP Tests for Illinois* Northwest Evaluation Association, 2016 Northwest Evaluation Association NWEA is committed to providing partners with useful tools to help make inferences from the Measures of Academic Progress MAP interim assessment scores One important tool is the concordance table between MAP and state summative assessments Concordance tables have been used for decades to relate scores on different tests measuring similar but distinct constructs These tables typically derived from statistical linking procedures provide a direct link between scores on different tests and serve various purposes Aside from describing how a score on one test relates to performance on another test they can also be used to identify benchmark scores on one test corresponding to performance categories on another test or to maintain continuity of scores on a test after the test is redesigned or changed Concordance tables are helpful for educators parents administrators researchers and policy makers to evaluate and formulate academic standing and growth Recently NWEA completed a concordance study to connect the scales of the Partnership for Assessment of Readiness for College and Careers PARCC English language arts ELA and math with those of the MAP Reading and MAP for Mathematics assessments for Illinois IL In this report presented are the 3rd through 8th grade cut scores on MAP reading and mathematics scales that correspond to the benchmarks that Illinois adopted for its PARCC ELA and math tests Information about the consistency rate of classification based on the estimated MAP cut scores is also provided along with a series of tables that predict the probability of receiving a Level 4 i.e Proficient or higher performance designation on the PARCC assessments based on the observed MAP scores taken during the same school year A detailed description of the data and analysis method used in this study is provided in the appendix *Smarter Balanced Preliminary Performance Levels* Northwest Evaluation

Association, 2015 Recently the Smarter Balanced Assessment Consortium Smarter Balanced released a document that established initial performance levels and the associated threshold scale scores for the Smarter Balanced assessment The report included estimated percentages of students expected to perform at each of the four performance levels reported by grade and test subject e g English Language Arts or Mathematics based on preliminary field testing of the Smarter Balanced assessment conducted during the spring of 2014 These threshold scale scores and expected percentages represent a preliminary attempt at standard setting and Smarter Balanced may revise them after the spring 2015 testing term Nevertheless they represent the best information currently available about the cut scores that will be used during the spring 2015 testing term of the Smarter Balanced test Using the information provided within the Smarter Balanced report about the percentages of students expected to perform at each level Northwest Evaluation Association NWEA conducted a series of analyses to examine what Measures of Academic Progress MAP interim assessment scores might be associated with these performance level categories This was not an empirical study in the manner of our normal scale linking studies because the Smarter Balanced assessment has not yet been fully implemented NWEA intends to work with its partner school districts to conduct such a study examining the relationship between MAP performance and Smarter Balanced performance for individual students once Smarter Balanced has been fully implemented within NWEA partner districts NWEA analyses focused on the percentages of students expected to perform within each of the Smarter Balanced performance levels NWEA compared these percentages to our own nationally representative normative distributions in order to estimate the MAP scores that would produce similar percentages of students as those expected to fall within the Smarter Balanced performance level categories The approach taken here is quite similar to the approach used in many prior linking studies and can provide highly accurate estimates of cut scores Links used in this document are contained in the appendix

Aligning the NWEA RIT Scale with the Maine Educational Assessments (MEA) John Cronin, 2004 Recently Northwest Evaluation Association NWEA completed a project to connect the scale of the MEA with NWEA's RIT scale Six Maine school systems participated in the study using test information from a group of over 800 students enrolled in fourth and eighth grade who took both the MEA and NWEA reading and mathematics tests in the spring of 2004 Information from these tests was used in a comprehensive study to identify the capacity of the RIT scale to predict success on the MEA and to identify performance level scores on the RIT scale that would indicate a good chance of success on this test Three methodologies linear regression second order regression and Rasch status on standards called Rasch SOS were used to derive estimates of cut scores In each case the most accurate of the three estimates was used to arrive at the recommended cut score seen in this report Cut scores were estimated for each of the performance levels at grades four and eight for reading and mathematics Contains 4 tables and 2 figures
