## **Nwf Guide To Climate Action Planning:**

**Climate Action Planning** Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2019-07-16 Climate change continues to impact our health and safety the economy and natural systems With climate related protections and programs under attack at the federal level it is critical for cities to address climate impacts locally Every day there are new examples of cities approaching the challenge of climate change in creative and innovative ways from rethinking transportation to greening city buildings to protecting against sea level rise Climate Action Planning is designed to help planners municipal staff and officials citizens and others working at local levels to develop and implement plans to mitigate a community's greenhouse gas emissions and increase the resilience of communities against climate change impacts This fully revised and expanded edition goes well beyond climate action plans to examine the mix of policy and planning instruments available to every community Boswell Greve and Seale also look at process and communication How does a community bring diverse voices to the table What do recent examples and research tell us about successful communication strategies Climate Action Planning brings in new examples of implemented projects to highlight what has worked and the challenges that remain A completely new chapter on vulnerability assessment will help each community to identify their greatest risks and opportunities Sections on land use and transportation have been expanded to reflect their growing contribution to greenhouse gas emissions The guidance in the book is put in context of international national and state mandates and goals Climate Action Planning is the most comprehensive book on the state of the art science and practice of local climate action planning It should be a first stop for any local government interested in addressing climate change

**Local Climate Action Planning** Michael R. Boswell, Adrienne I. Greve, Tammy L. Seale, 2012-07-16 Climate change is a global problem but the problem begins locally Cities consume 75% of the world's energy and emit 80% of the world's greenhouse gases Changing the way we build and operate our cities can have major effects on greenhouse gas emissions Fortunately communities across the U S are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions This is the first book designed to help planners municipal staff and officials citizens and others working at local levels to develop Climate Action Plans CAPs are strategic plans that establish policies and programs for mitigating a community's greenhouse gas GHGs emissions They typically focus on transportation energy use and solid waste and often differentiate between community wide actions and municipal agency actions CAPs are usually based on GHG emissions inventories which identify the sources of emissions from the community and quantify the amounts Additionally many CAPs include a section addressing adaptation how the community will respond to the impacts of climate change on the community such as increased flooding extended drought or sea level rise With examples drawn from actual plans Local Climate Action Planning guides preparers of CAPs through the entire plan development process identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective

*Planning for Climate Change* Elisabeth M. Hamlin Infield, Yaser Abunnasr, Robert L. Ryan, 2018-09-18 This book provides an overview of the large and interdisciplinary literature on the substance and process of urban climate change planning and design using the most important articles from the last 15 years to engage readers in understanding problems and finding solutions to this increasingly critical issue The Reader's particular focus is how the impacts of climate change can be addressed in urban and suburban environments what actions can be taken as well as the need for and the process of climate planning Both reducing greenhouse gas emissions as well as adapting to future climate are explored Many of the emerging best practices in this field involve improving the green infrastructure of the city and region providing better on site stormwater management more urban greening to address excess heat zoning for regional patterns of open space and public transportation corridors and similar actions These actions may also improve current public health and livability in cities bringing benefits now and into the future This Reader is innovative in bringing climate adaptation and green infrastructure together encouraging a more hopeful perspective on the great challenge of climate change by exploring both the problems of climate change and local solutions
