**Disability and Video Games** Markus Spöhrer, Beate Ochsner, 2023-12-18. This collection intends to fill a long overdue research gap on the praxeological aspects of the relationships between disabilities, accessibility, and digital gaming. It will focus on the question of how Game Studies can profit from a Disability Studies perspective of enabling gaming and issues of disability in accessibility and ableism, and vice versa. Instead of departing from the medical model of disability that informs a wide range of publications on disabled gaming and that preconceives users as either able-bodied, normal, or as disabled, deficit, or unable to play, our central premise is that disability is not an essential characteristic of the playing subject. We rather intend to analyze the complex infrastructures of playing, i.e., the complex interplay of heterogeneous human and non-human actors that are enabling or disabling.
