Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Buddhist Hybrid Sanskrit Grammar and Dictionary (2 Vols.) Franklin Edgerton, This is the first attempt at a description of the grammar and lexicon of Buddhist Hybrid Sanskrit Most North Indian Buddhist texts are composed in it It is based primarily on an old Middle Indic vernacular not otherwise identifiable But there seems reason to believe that it contains features that were borrowed from other Middle Indic dialects In other words even its Middle Indic aspects are dialectically somewhat mixed Most strikingly however BHS was also extensively influenced by Sanskrit from the very beginning of the tradition as it has been transmitted to us and increasingly as time went on Many especially later products of this tradition have often though misleadingly been called simply Sanskrit without qualification In principle the author has excluded from the grammar and dictionary all forms which are standard Sanskrit and all words which are used in standard Sanskrit with the same meanings
