Question 4

(a) (i) The diagram shows a curve on a Cartesian coordinate system. The horizontal axis is labeled x and the vertical axis is labeled y . The curve starts at the origin $(0,0)$ and passes through the points $(2, 1)$, $(4, 2)$, $(6, 3)$, and $(8, 4)$. The grid lines are spaced at intervals of 1 unit.

(ii) The area under the curve from $x = 0$ to $x = 8$ is shaded. The area is divided into four regions by vertical lines at $x = 2$, $x = 4$, and $x = 6$. The area of the region bounded by the curve, the x -axis, and the line $x = 2$ is 2 square units.

(b) (i) The diagram shows a right-angled triangle ABC with the right angle at C . The side $AC = 3$ cm and the side $BC = 4$ cm. The hypotenuse is AB . The angle A is marked. The area of the triangle is 6 cm².

(ii) The diagram shows a right-angled triangle ABC with the right angle at C . The side $AC = 3$ cm and the side $BC = 4$ cm. The hypotenuse is AB . The angle A is marked. The area of the triangle is 6 cm².

(iii) The diagram shows a right-angled triangle ABC with the right angle at C . The side $AC = 3$ cm and the side $BC = 4$ cm. The hypotenuse is AB . The angle A is marked. The area of the triangle is 6 cm².

Find AB .

In $\triangle ABC$

$$AB^2 = AC^2 + BC^2$$
$$= 3^2 + 4^2$$
$$= 9 + 16$$
$$= 25$$
$$AB = \sqrt{25}$$
$$= 5$$

$\theta = \tan^{-1}\left(\frac{BC}{AC}\right)$

$$= \tan^{-1}\left(\frac{4}{3}\right)$$
$$= 53.1^\circ$$

Exploring the Role of Visualization in Climate Change Communication - an Audience Perspective Anne Gammelgaard Ballantyne, 2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web

based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change. The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences. Nevertheless, despite these communicative qualities, the analyses also show that participants' interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations. Although climate visualization can enhance a sense of proximity with climate change, the localization of climate risk can also lead to participants downplaying the significance of climate impacts. In addition, despite the intentions of inducing a sense of agency in both cases of climate visualization, participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors. These findings show that although climate visualization presents certain communicative qualities, it is not a panacea for engaging lay audiences with climate change. This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication.

Kommunikation kring klimat förändringar är ett aktuellt och relevant ämne och många bedömare anser att kommunikation kring orsaker, effekter och möjliga alternativ är en viktig del i arbetet med att mota klimatutmaningarna. Klimatvisualisering är en process för att skildra klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning. I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan. I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppsminskningar och klimatanpassning. Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv. Denna avhandling adresserar denna kunskapslucka. Det övergripande syftet är således att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman tolkar innebörden av klimatförändringar som de representeras i, till exempel, klimatvisualisering. Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv. Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till, till exempel, klimatvisualisering i en film som visas i en domsteater framtagen för svenska gymnasieelever med möjligheten att uppmuntra till reflektion kring klimatförändringarnas orsaker, effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja husägare i Norden att anpassa sig till klimatförändringarnas lokala effekter. Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan för klimatförändringarna att framstå som mer personligt relevanta och intressanta för målgruppen. Dock visar analyserna även trots dessa kommunikativa kvaliteter att

deltagarnas tolkningar formas av deras erfarenheter om klimatförändringar som ett globalt och avlägset problem som ska lösas av andra aktörer som nationella regeringar eller genom internationella politiska förhandlingar. Men om klimatvisualisering kan förstärka känslan av närhet till klimatförändringar kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned de lokala klimatriskernas betydelse. Dessutom trots att både fallen av klimatvisualisering avsevärt skapa en känsla av att kunna påverka blev svaret för klimatutgårderna fortfarande kritisk förhandling från deltagarnas sida. De förklade svaret för att hantera klimatutmaningarna till andra aktörer. Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte någon egentlig för klimatkommunikation. Detta understryker även vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handlingen när man studerar och utvecklar verktyg för klimatvisualisering.

Radicalized Peter R. Neumann, 2016-09-30 The attacks in Paris in January and November 2015 heralded the beginning of a new wave of terrorism one rooted in the ongoing conflict in Syria and Iraq. As ISIS seeks to expand its reach in the Middle East its territory serves as a base for training and operations for a new generation of jihadis. Thousands of young people from the West primarily from Europe have travelled to join ISIS re-emerging as hardened fighters with military training and a network of international contacts. Many of these have now returned to their homelands where it is feared they are planning a new series of brutal attacks. Peter R. Neumann here explains the phenomenon of the new jihadis and shows why the threat of terrorism in the West is greater than ever before. Based on interviews and previously unseen material Neumann provides an essential introduction to one of the greatest crises of our time.

India's Emerging Energy Relations Girijesh Pant, 2015-10-09 This book analyzes the role of energy in Indian foreign policy particularly in defining bilateral relations. It also focuses on the critical gaps in conceptualizing its formulations and recommends a framework for sustainable energy security. India the fourth largest consumer of oil is an energy deficit economy importing more than eighty percent of its needs. This makes securing energy integral to its foreign policy goals. Obviously it is important for India to actively participate in the global energy market and establish robust enduring and nuanced diplomatic relations with energy exporting countries. Equally important is that India diversifies its energy mix and moves towards carbon free growth. Renewable energy is today high on the global energy agenda. Indian energy policy thus has to address a range of issues domestically and on foreign turf. It has to move beyond the transactional mode by creating equity in the global energy industry. Today the global energy regime is undergoing fundamental changes as is the power dynamics of the global energy order. There are now many new producers and diverse consumers. The trade in energy has increased in volume and its direction has shifted from the West to the East and the ongoing structural changes in the energy market call for a new security architecture. Given the complex and competitive environment of the new geo-economics and geopolitics of energy the question could well be should India frame energy issues in conflict mode or move toward innovative cooperation. In either case the message is that India needs an integrated energy security policy.
