Credit Rating Governance Ahmed Naciri,2015-01-30 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market In the recent financial crisis their power and reliability were often questioned yet a simple rating downgrade could threaten to bankrupt a whole country This book

examines the governance of credit rating agencies as expressed by their ability to fairly ethically and consistently assign higher rates to issuers having lesser default risks However factors such as the drive for increased revenue and market share the inadequate business model the inadequate methodology of assessing risk opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies This book explores these issues and proposes some potential solutions and improvements This will be of interest to researchers and advanced students of corporate finance finance financial economics risk management investment management and banking Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality *Dire Straits-Education Reforms* Montserrat Gomendio, José Ignacio Wert, 2023-02-14 Responding to an educational emergency generated largely by the difficulties of implementing education reforms this book compares education policies around the world in order to understand what works where To address the key question of why education reforms are so difficult the authors take into account a broad range of relevant factors such as governance ideology and stakeholder conflicts of interest and their interactions with one another Drawing on their experiences as policymakers in the Spanish government and as governmental advisors worldwide Montserrat Gomendio and Jose Ignacio Wert produce a publication like no other shifting the usual Eurocentric narrative and shedding light on frequently overlooked educational policies from elsewhere In this context they dive deeper into details of educational failures and successes the processes of implementation and investment

priorities in different countries They provide revealing accounts of stakeholder conflicts of interest and the challenges of implementing educational reform during a financial crisis The authors also investigate why the evidence from international large scale assessments ILSAs has contrary to expectation not generated improvements in most education systems Gomendio and Wert investigate the evolution of different education systems closely examining their advances or declines Gomendio and Wert s expert voices illuminate the current state of global education systems and the necessary changes to ensure long awaited improvements This is a revelatory and informative resource for policymakers teachers and academics alike

The Case against Education Bryan Caplan, 2018-01-30 Why we need to stop wasting public funds on education Despite being immensely popular and immensely lucrative education is grossly overrated In this explosive book Bryan Caplan argues that the primary function of education is not to enhance students skill but to certify their intelligence work ethic and conformity in other words to signal the qualities of a good employee Learn why students hunt for easy As and casually forget most of what they learn after the final exam why decades of growing access to education have not resulted in better jobs for the average worker but instead in runaway credential inflation how employers reward workers for costly schooling they rarely if ever use and why cutting education spending is the best remedy Caplan draws on the latest social science to show how the labor market values grades over knowledge and why the more education your rivals have the more you need to impress employers He explains why graduation is our society s top conformity signal and why even the most useless degrees can certify employability He advocates two major policy responses The first is educational austerity Government needs to sharply cut education funding to curb this wasteful rat race The second is more vocational education because practical skills are more socially valuable than teaching students how to outshine their peers Romantic notions about education being good for the soul must yield to careful research and common sense

The Case against Education points the way

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus

on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change Shadow Education and Social Inequalities in Japan Steve R. Entrich, 2017-12-07 This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide It sheds light on the causes of this high dependence on shadow education and its implications for social inequalities The book provides a deep and extensive understanding of the role of this kind of education in Japan It shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses Contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education Against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly Western societies without traditional large scale shadow education markets The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable Empowering Novice Academics for Student Success Dr Johann Hugo, 2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges Student success is a burning issue both globally and locally While student achievement is determined by a combination of factors teachers and their teaching practices do matter Higher education teachers are expected to fulfil different roles at different times such as planning for curriculum implementation mentorship and coaching facilitating learning resource development and student assessment Against this background the primary purpose of Empowering novice academics for student success Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput **National Conference on Multidisciplinary Research** Smt.I.S. yadwad Government first grade college, The Oxford Handbook of Banking Allen N. Handbook of Research on the Education of Young Children Olivia N. Saracho, 2019-10-30 The Handbook of Research on the Education of Young Children is the essential reference on research on early childhood education throughout the world This outstanding resource provides a comprehensive research overview of important contemporary issues as well as the information necessary to make knowledgeable judgments about these issues Now in its fourth edition this handbook features all new sections on social emotional learning non cognitive assessment child development early childhood education content areas teacher preparation technology multimedia and English language learners With thorough updates to chapters and references this new edition remains the cutting edge resource for making the field's extensive knowledge base readily available and accessible to researchers and educators It is a valuable resource for all of those who work and study in the field of early childhood education including researchers educators policy makers librarians and school administrators This volume addresses critical up to date research on several disciplines such as child development early childhood education psychology curriculum teacher preparation policy evaluation strategies technology and multimedia exposure A Compelling Case for Universities Quintin McKellar, 2025-05-01 This book unapologetically celebrates the achievements of the University Major drivers of enlightenment and powerhouses of the economy universities have evolved and thrived for over a thousand years While still reflecting their beginnings in medieval knowledge sharing communities modern universities have grown exponentially in both size and number Predictions suggest global student numbers will more than double from 216 million in 2016 to 472 million in 2035 This growth has demanded new models of funding as well as many new providers who have added diversity and complexity to the traditional idea of a university The author recounts this exciting evolution before

turning to the major issues with which higher education is concerned today broadly following the student journey from admission to graduation and beyond A prospective university student first needs to gain a place the process throwing up important questions about access and equity Once admitted they can benefit from not only the education on offer but a wealth of extra curricular opportunities And research suggests that once they leave the experience of university will enrich their life in numerous ways With clearheaded chapters on research and innovation and thoughtful excursions into funding and governance together with some proposals for change this is a trenchant review of today s university landscape which nonetheless concludes that the current model of higher education is both highly effective and sufficiently adaptive Whilst facing up to difficult issues which must be addressed Professor McKellar derives satisfaction from the evidence of great overall achievement
