November 2014 Business Studies Scope:

Sustainable Investing Cary Krosinsky, Sophie Purdom, 2016-12-08 A seminal shift has taken place in the world of investing. A clear and overarching reality has emerged which must be solved: financial considerations must factor in sustainability considerations for ongoing societal success while sustainability issues equally need to be driven by a business case. As a result, investment practices are evolving especially towards more positive philosophies and frameworks. *Sustainable Investing* brings the reader up to speed on trends playing out in each region and asset class drawing on contributions from leading practitioners across the globe. Implications abound for financial professionals and other interested investors as well as corporations seeking to understand future investment trends that will affect their shareholders thinking. Policymakers and other stakeholders also need to be aware of what is happening in order to understand how they can be most effective at helping implement and enable the changes arguably now required for economic and financial success. *Sustainable Investing* represents an essential overview of sustainable investment practices that will be a valuable resource for students and scholars of sustainable banking and finance as well as professionals and policymakers with an interest in this fast moving field.

The Autonomy of Labour Law Alan Bogg, Cathryn Costello, ACL Davies, Jeremias Adams-Prassl, 2015-03-26 To what extent is labour law an autonomous field of study? This book is based upon the papers written by a group of leading international scholars on this theme delivered at a conference to mark Professor Mark Freedland's retirement from his teaching fellowship in Oxford. The chapters explore the boundaries and connections between labour law and other legal disciplines such as company law, competition law, contract law and public law; labour law and legal methodologies such as reflexive governance and comparative law; and labour law and other disciplines such as ethics, economics and political philosophy. In so doing it represents a cross section of the most sophisticated current work at the cutting edge of labour law theory.

Handbook on the Economics of the Internet Johannes M. Bauer, Michael Latzer, 2016-05-27 The Internet is connecting an increasing number of individuals, organizations and devices into global networks of information flows. It is accelerating the dynamics of innovation in the digital economy, affecting the nature and intensity of competition and enabling private companies, governments and the non profit sector to develop new business models. In this new ecosystem many of the theoretical assumptions and historical observations upon which economics rests are altered and need critical reassessment.

Handbook of Research on International Entrepreneurship Strategy Pervez N. Ghauri, V.H. Manek Kirpalani, 2015-11-27 This impressive Handbook provides a dynamic perspective on the international entrepreneurial strategies of SMEs including the role and experience of their founders as well as the collaboration of these SMEs in networks with larger firms. The expert contributors from all over the world and the editors explore the origin and evolution of internationalizing SMEs, the changing history and the future outlook of this sector. They study the effects of different cultures on the origin and growth of entrepreneurship and SMEs. The Handbook also outlines the various types of Born Globals that emerge from different parts

of the world This book will prove essential reading for researchers and students of international business entrepreneurship and SMEs Founders of internationalizing SMEs will also learn about novel management practices whilst educational institutions and governments will find invaluable insights on how to foster and support SMEs in their internationalization efforts Israel Internet, E-Commerce Investment and Business Guide - Strategic Information, Regulations, Opportunities

Heusden,2025-09-01 Imagine every ad every price and even every contract completely tailored to you welcome to the age of AI driven hyper personalization Today vast amounts of consumer data are collected and processed to build individualized profiles with ever increasing precision This enables one to one interactions that evolve in real time and allow firms to influence behavior with unprecedented subtlety Personalized marketing holds the promise of meeting consumer needs more effectively and making digital experiences more relevant and efficient Yet this seemingly customized environment raises urgent concerns about the power of such marketing to exploit cognitive biases reshape preferences and deepen asymmetries in digital markets This book offers the first in depth law and economics analysis of personalized marketing in the digital age It examines how personalized advertising pricing and contracting challenge foundational principles of consumer protection and explores to what extent these practices are regulated under the current EU legal framework The analysis shows that while existing rules provide some safeguards they fall short of addressing the systemic risks posed by hyper personalization To respond to these challenges the book develops a four part policy approach aimed at reinforcing consumer autonomy equity and welfare in data driven markets and bridging the regulatory gaps that personalization opens up Regulating these developments involves a clear trade off between efficiency and fairness How much freedom do you give up in exchange for a hyper personalized experience How confident are you that the price you pay will not exceed what others pay for the exact same service And what does it mean for your autonomy when an algorithm predicts your behavior better than you do yourself This book offers a critical starting point for future regulation and a call to rethink the role of personalization in the digital economy **Exporting Transnational Education** Vangelis Tsiligris,William Lawton,2018-07-04 This book focuses on the

dynamic and rapidly expanding field of transnational higher education TNE Despite the increasing importance of TNE and the interest it has attracted from various stakeholders there is a lack of theoretical and empirical evidence on several aspects pertaining to its operation and governance This book provides a unique combination of contributions from researchers and practitioners in a wide variety of case studies from TNE exporting countries in Europe and Asia In doing so the editors with added support from Dr Christopher Hill examine how this gap between research and practice can be bridged This valuable edited collection will be of use to researchers and practitioners in transnational education as well as students and scholars of international education and higher education policy **Proceedings of the 15th European Conference on**

Environmental Pollution and the Media Glenn D. Hook, Libby Lester, Meng Ji, Kingsley Edney, Chris G. Pope, Luli van der Does-Ishikawa, 2017-04-07 This book offers a theoretically informed empirical investigation of national media reporting and political discourse on environmental issues in Australia China and Japan It illuminates the risks harms and responsibilities associated with climate change through an analysis of pollution adopting an interdisciplinary approach drawing on both the social sciences and humanities A particular strength of the work is the detailed analysis of the data using a range of both quantitative and qualitative techniques enabling the authors to reveal in rich and compelling detail the complex relationship between risk and responsibility in the climate change discourse The case studies of Australia China and Japan are set in the current literature as well as in the historical context of climate change in these three countries The analysis of the media discourse on the Great Barrier Reef in Australia demonstrates how the mining of coal for overseas markets has led to devastating harm to the life of the reef A critical discussion of the Chinese documentary Under the Dome shows how this medium has played a crucial role in building awareness of the harm from atmospheric pollution among the citizens shaping attitudes and promoting action The first case study of Japan elucidates how cross border atmospheric pollution from China forges a chain of responsibility for responding to climate change running from the state to society The other case study of Japan demonstrates how smart cities have emerged as a way to mitigate the risks and harms of climate change The Conclusion draws together the similarities and differences in how climate change is addressed in the three countries In all *Environmental Pollution and the Media* Political Discourses of Risk and Responsibility in Australia China and Japan uncovers the dynamics of the triadic relationship among risk harm and climate change in Australia China and Japan By so doing the book makes an original and timely contribution to understanding comparative media discourse and political debates on climate change

Market Expansion and Social Dumping in Europe Magdalena Bernaciak, 2015-06-05 The term social

dumping regularly appears in public debates and in policymaking circles. However, due to its ambiguity, it is used in a manner that is convenient for individual discourse participants, thus opening the door for misconceptions and ill-grounded accusations. This book systematically examines social dumping in the context of the European integration process. It defines social dumping as the practice undertaken by self-interested market participants of undermining or evading existing social regulations with the aim of gaining a competitive advantage. It also shows how the two major EU integration projects, the creation of the Internal Market and EU enlargement to the east and to the south, have provided market actors with new incentives and opportunities to contest existing social constraints. The empirical chapters examine social dumping practices accompanying labour migration, employee posting, and cross-border investment distribution. In addition, they outline the process of formation of social standards and trace initiatives at EU and national levels that contribute to the spread of social dumping in Europe. This book will be of interest to scholars and students of employment relations, EU studies, international political economy, globalisation studies, welfare studies, social policy, and migration studies.

Business Groups in the West
Asli M. Colpan, Takashi Hikino, 2018-02-15

This volume aims to explore the long-term evolution of different varieties of large enterprises in today's developed economies. It focuses on the economic institution of business groups and attempts to comprehend the factors behind their rise, growth, struggle, and resilience; their behavioral and organizational characteristics; and their roles in national economic development. The volume seeks to enhance the scholarly and policy-oriented understanding of business groups in developed economies by bringing together state-of-the-art research on the characteristics and contributions of large enterprises in an evolutionary perspective. While business groups are a dominant and critical organization model in contemporary emerging economies and have lately attracted much attention in academic circles, their counterparts in developed economies have not been systematically examined. This book aims to fill this gap in the literature and is the first scholarly attempt to explore the evolutionary paths and contemporary roles of business groups in developed economies from an internationally comparative perspective. In doing so, it argues that business groups actually rose to function as a critical factor of industrial dynamics in the context of the Second Industrial Revolution in the late nineteenth century. They have adapted their characteristic roles and transformed to fit the changing market and institutional settings. As they flexibly co-evolve with the environment, the volume shows that business groups can remain as a viable organization model in the world's most advanced economies today.
