Organizational Behaviour Daniel King, Scott Lawley, 2016 The best selling textbook in organizational behaviour critical practical supportive **Stress and Steroid regulation of synaptic transmission: from physiology to pathophysiology** Menahem Segal, Harmen J. Krugers, Nicola Maggio, Recently several pioneering discoveries have identified new roles of stress and steroid hormones in modulating CNS functions Specifically glucocorticoids mineralocorticoids sex hormones and neurosteroids have been shown to affect synaptic receptors and ion channels and therefore regulate in a complex manner physiological processes ranging from homeostatic to cognitive functions Likewise in some disorders of the nervous system steroid hormones have been shown to play different roles either favoring or combating the disease process In this Frontier Research Topic we have put together leaders in the field to provide novel opinions on the effects of steroid hormones on synaptic transmission and plasticity from ion channels to pathophysiological processes We expect critical reviews of the work that has been conducted recently in this area and enrich these discussions with the novel exciting new findings *Jordan and the Arab Uprisings* Curtis R. Ryan, 2018-06-26 In 2011 as the Arab uprisings spread across the Middle East Jordan remained more stable than any of its neighbors Despite strife at its borders and an influx of refugees connected to the Syrian civil war and the rise of ISIS as well as its own version of the Arab Spring with protests and popular mobilization demanding change Jordan managed to avoid political upheaval How did the regime survive in the face of the pressures unleashed by the Arab uprisings What does its resilience tell us about the prospects for reform or revolutionary change In *Jordan and the Arab Uprisings* Curtis R Ryan explains how Jordan weathered the turmoil of the Arab Spring Crossing divides between state and society government and opposition Ryan analyzes key features of Jordanian politics including Islamist and leftist opposition parties youth movements and other forms of activism as well as struggles over elections reform and identity He details regime survival strategies laying out how the monarchy has held out the possibility of reform while also seeking to coopt and contain its opponents Ryan demonstrates how domestic politics were affected by both regional unrest and international support for the regime and how regime survival and security concerns trumped hopes for greater change While the Arab Spring may be over Ryan shows that political activism in Jordan is not and that struggles for reform and change will continue Drawing on extensive fieldwork and interviews with a vast range of people from grassroots activists to King Abdullah II *Jordan and the Arab Uprisings* is a definitive analysis of Jordanian politics before during and beyond the Arab uprisings

Selfie Democracy Elizabeth Losh, 2022-09-06 How politicians digital strategies appeal to the same fantasies of digital connection access and participation peddled by Silicon Valley Smartphones and other digital devices seem to give us a direct line to politicians But is interacting with presidential tweets really a manifestation of digital democracy In *Selfie Democracy* Elizabeth Losh examines the unintended consequences of politicians digital strategies from the Obama campaign s pioneering construction of an online community to Trump s Twitter dominance She finds that politicians who use digital

media appeal to the same fantasies of digital connection access and participation peddled by Silicon Valley Meanwhile smartphones and social media don't enable participatory democracy so much as they incentivize citizens to perform attention getting acts of political expression Losh explores presidential rhetoric casting digital media as tools of democracy describes the conflation of gender and technology that contributed to Hillary Clinton's defeat in 2016 chronicles the Biden campaign's early digital stumbles in 2020 and recounts the TikTok campaign that may have spoiled a Trump rally She shows that although Obama and Trump may seem diametrically opposed in both style and substance they both used mobile digital media in ways that reshaped the presidency and promised a new kind of digital democracy Obama used data and digital media to connect to citizens without intermediaries Trump followed this strategy to its most extreme conclusion What were the January 6 insurrectionists doing as they livestreamed themselves and their cohorts attacking the Capitol but practicing their own brand of selfie democracy

The Metropolitan Revolution Bruce Katz, Jennifer Bradley, 2013-06-19 Across the US cities and metropolitan areas are facing huge economic and competitive challenges that Washington won't or can't solve The good news is that networks of metropolitan leaders mayors business and labor leaders educators and philanthropists are stepping up and powering the nation forward These state and local leaders are doing the hard work to grow more jobs and make their communities more prosperous and they're investing in infrastructure making manufacturing a priority and equipping workers with the skills they need In *The Metropolitan Revolution* Bruce Katz and Jennifer Bradley highlight success stories and the people behind them New York City Efforts are under way to diversify the city's vast economy Portland Is selling the sustainability solutions it has perfected to other cities around the world Northeast Ohio Groups are using industrial age skills to invent new twenty-first century materials tools and processes Houston Modern settlement house helps immigrants climb the employment ladder Miami Innovators are forging strong ties with Brazil and other nations Denver and Los Angeles Leaders are breaking political barriers and building world class metropolises Boston and Detroit Innovation districts are hatching ideas to power these economies for the next century The lessons in this book can help other cities meet their challenges Change is happening and every community in the country can benefit Change happens where we live and if leaders won't do it citizens should demand it *The Metropolitan Revolution* was the 2013 Foreword Reviews Bronze winner for Political Science

Managerialism T. Klikauer, 2013-09-05 Most people know what management is but often people have vague ideas about Managerialism This book introduces Managerialism and its ideology as a colonising project that has infiltrated nearly every eventuality of human society

Chemical Energy from Natural and Synthetic Gas Yatish T. Shah, 2017-03-16 Commercial development of energy from renewables and nuclear is critical to long term industry and environmental goals However it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures Gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil nuclear and renewable energies *Chemical Energy from Natural and Synthetic Gas* illustrates

this point by examining the many roles of natural and synthetic gas in the energy and fuel industry addressing it as both a transition and end game fuel The book describes various types of gaseous fuels and how they are recovered purified and converted to liquid fuels and electricity generation and used for other static and mobile applications It emphasizes methane syngas and hydrogen as fuels although other volatile hydrocarbons are considered It also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas The book also deals applications such as the use of natural gas in power production in power plants engines turbines and vehicle needs Presents a unified and collective look at gas in the energy and fuel industry addressing it as both a transition and end game fuel Emphasizes methane syngas and hydrogen as fuels Covers gas storage and transport infrastructure Discusses thermal gasification gas reforming processing purification and upgrading Describes biogas and bio hydrogen production Deals with the use of natural gas in power production in power plants engines turbines and vehicle needs Convergent Media and Privacy Tim Dwyer,2015-10-19 A lot of personal data is being collected and stored as we use our media devices for business and pleasure in mobile and online spaces This book helps us contemplate what a post Facebook or post Google world might look like and how the tensions within capitalist information societies between corporations government and citizens might play out *Governomics* Ian McAuley,Miriam Lyons,2015-05-01 People have good reason to demand decent public education and a well funded health system to yearn for an economy that doesn t trash the environment or for a smaller gap between rich and poor Almost without exception sound economics is on their side We ve grown used to public debates that pit people and the planet against an abstract distorted image of the economy but it doesn t have to be this way *Governomics* shows that an emaciated state is bad for business and that standing up for government means standing up for a public sector that truly serves the public Everybody knows governments are wasteful incompetent and a drag on the economy But if you re not sure that s true read this book Ross Gittins Sydney Morning Herald and The Age *Governomics* shows that a market economy can only work when sustained by a strong and active public sector It will inject some much needed economic sanity into conversations on the role of government in Australia John Quiggin Australian Research Council Laureate Fellow University of Queensland *Women in War* Rebecca Rissman,2016-08-15 Women have made a difference in every field imaginable and they continue to do so today *Women s Lives in History* introduces readers to dozens of these remarkable people *Women in War* features groundbreaking figures in medicine on the front lines on the homefront and in many other roles Compelling text and vivid photographs bring these women to life Features include essential facts a timeline a glossary additional resources source notes and an index Aligned to Common Core Standards and correlated to state standards Essential Library is an imprint of Abdo Publishing a division of ABDO *Critical Theory and Social Media* Thomas Allmer,2015-04-10 Social media platforms such as Facebook YouTube and Twitter are enormously popular they are continuously ranked among the most frequently accessed websites worldwide However there are as yet few studies which

combine critical theoretical and empirical research in the context of digital and social media The aim of this book is to study the constraints and emancipatory potentials of new media and to assess to what extent digital and social media can contribute to strengthen the idea of the communication and network commons and a commons based information society Based on a critical theory and political economy approach this book explores the foundational concepts of a critical theory of media technology and society users knowledge attitudes and practices towards the antagonistic character and the potentials and risks of social media whether technological and or social changes are required in order to bring about real social media and human liberation Critical Theory and Social Media examines both academic discourse on and users responses to new media making it a valuable tool for international scholars and students of sociology media and communication studies social theory new media and information society studies Its clear and interesting insights into corporate practices of the global new media sector will mean that it appeals to critical social media users around the world American Military Life in the 21st Century Eugenia L. Weiss, Carl Andrew Castro, 2018-11-16 A comprehensive guide to the lives and experiences of military service members veterans and their families in the United States today with special emphasis given to those of the post 9 11 era This reference work provides detailed information on the issues U S service members face both stateside and during deployments overseas Issues covered include relations with family substance use housing educational and job training opportunities post traumatic stress disorder and other health issues and experiences of women sexual minorities and ethnic racial minorities in the armed services This set also examines major issues related to military service for people close to the men and women who serve our country such as spouses or partners children and parents grappling with such issues as single parenthood during deployment and bereavement at the loss of a loved one Finally this set is a valuable resource for people seeking a greater understanding of the issues that confront some military service members and veterans from chronic health problems to economic vulnerability to suicide to incarceration The two volumes are written in a comprehensive yet succinct and accessible style by experts familiar with the latest trends and findings *Technological Innovation in Legacy Sectors* William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don't head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to

innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system **Debating Modern Medical Technologies**

Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors Medical technologies often promise to extend and improve quality of life but come with many questions Are they safe and effective Are they worth the cost When should they be allowed on the market and when should Medicare Medicaid and private insurance companies be required to pay for drugs devices and diagnostic tests Using case studies of disputes about the value of mammography screening genetic testing for disease risk brain imaging technologies to detect biomarkers associated with Alzheimer s disease cell based therapies and new expensive drugs Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies physicians and patient advocates Debating Modern Medical Technologies The Politics of Safety Effectiveness and Patient Access reveals stakeholders differing values and interests regarding patient choice physician autonomy risk assessment government intervention in medicine and technology assessment and scientific innovation as a driver of national and global economies It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients Subordinating Intelligence David P. Oakley, 2019-03-15 In the late eighties and early nineties driven by the post

Cold War environment and lessons learned during military operations United States policy makers made intelligence support to the military the Intelligence Community s top priority In response to this demand the CIA and DoD instituted policy and organizational changes that altered their relationship with one another While debates over the future of the Intelligence Community were occurring on Capitol Hill the CIA and DoD were expanding their relationship in peacekeeping and nation

building operations in Somalia and the Balkans By the late 1990s some policy makers and national security professionals became concerned that intelligence support to military operations had gone too far In Subordinating Intelligence The DoD CIA Post Cold War Relationship David P Oakley reveals that despite these concerns no major changes to national intelligence or its priorities were implemented These concerns were forgotten after 9 11 as the United States fought two wars and policy makers increasingly focused on tactical and operational actions As policy makers became fixated with terrorism and the United States fought in Iraq and Afghanistan the CIA directed a significant amount of its resources toward global counterterrorism efforts and in support of military operations

Accounting at War Warwick Funnell, Michele

Chwastiak, 2015-03-24 Accounting is frequently portrayed as a value free mechanism for allocating resources and ensuring they are employed in the most efficient manner Contrary to this popular opinion the research presented in Accounting at War demonstrates that accounting for military forces is primarily a political practice Throughout history military force has been so pervasive that no community of any degree of complexity has succeeded in Through to the present day for all nation states accounting for the military and its operations has primarily served broader political purposes From the Crimean War to the War on Terror accounting has been used to assert civilian control over the military instill rational business practices on war and create the visibilities and invisibilities necessary to legitimize the use of force Accounting at War emphasizes the significant power that financial and accounting controls gave to political elites and the impact of these controls on military

performance Accounting at War examines the effects of these controls in wars such as the Crimean South African and Vietnam wars Accounting at War also emphasizes how accounting has provided the means to rationalize and normalize violence which has often contributed to the acceleration and expansion of war Aimed at researchers and academics in the fields of accounting accounting history political management and sociology Accounting at War represents a unique and critical perspective to this cutting edge research field Homeland Security, its Law and its State Christos

Boukalas,2014-03-26 This book assesses the impact of post 9 11 domestic counterterrorism policy on US political life It examines political discourse law institutional architecture and state population relations and shows that homeland security is a project with wide ranging implications for democratic institutions and culture These implications are addressed through a novel approach that treats law and the state as social relations and relates developments in law to those in the state and in social dynamics On this basis the book examines the new political representations in counterterrorism discourse especially regarding the relation between the state and the population It examines the form and content of counterterrorism law the powers it provides and the structure and functions it prescribes for the state By focusing on the new Department of Homeland Security and the restructuring of the intelligence apparatus the book assesses the new intelligence led policing model Finally it examines forms of popular support and resistance to homeland security to discuss citizenship and state population relations The author concludes that homeland security has turned the US into a hybrid polity the legal and political institutions of democracy remain intact but their content and practices become authoritarian and exclude the population from politics These legal and political forms remain operative beyond counterterrorism in the context of the present economic crisis They are a permanent configuration of power This book is an indispensable companion for students of counter Terrorism and Security Studies Politics Human Rights Constitutional and Criminal Law American Studies and Criminology *Hard Target* Stephan Haggard,Marcus Noland,2017-05-30 Because authoritarian regimes like North Korea can impose the costs of sanctions on their citizens these regimes constitute hard targets Yet authoritarian regimes may also be immune and even hostile to economic inducements if such inducements imply reform and opening This book captures the effects of sanctions and inducements on North Korea and provides a detailed reconstruction of the role of economic incentives in the bargaining around the country s nuclear program Stephan Haggard and Marcus Noland draw on an array of evidence to show the reluctance of the North Korean leadership to weaken its grip on foreign economic activity They argue that inducements have limited effect on the regime and instead urge policymakers to think in terms of gradual strategies Hard Target connects economic statecraft to the marketization process to understand North Korea and addresses a larger debate over the merits and demerits of engagement with adversaries **Federal Register** ,2013-02
