Authoritarian Nations Petra Alderman, 2023-07-28 Branding Authoritarian Nations offers a novel approach to the study of nation branding as a strategy for political legitimization in authoritarian regimes using the example of military ruled Thailand. The book argues that nation branding is a political act that is integral to state legitimization processes particularly in the context of authoritarian regimes. It applies its alternative reading of nation branding to eight different sectors: tourism, economy, foreign direct investment, foreign policy, education, culture, public relations, and the private sector. The author explains that nation branding produces specific kinds of applied national myths referred to as strategic national myths. She shows that nation branding is an inherently inward looking strategy aimed at shaping the social attitudes and behaviours of the nation's citizens in line with the government's domestic agenda and legitimization needs. Providing the first comprehensive analysis of nation branding in Thailand and the first book length account of the country's political developments since the 2014-2019 military rule, the book is primarily aimed at academics in the disciplines of politics, international relations, communication, and area studies, as well as business, cultural, and intercultural studies. **For the Love of Learning** Tim Bilham, 2013-11-11 Edited collection featuring essays from exceptional National Teaching Fellows.
