Agricultural Reform in Rwanda Chris Huggins,2017-10-15 International observers have lauded Rwanda as an example of an African country taking control of its own development trajectory and as a market friendly destination for investment A key component of this narrative has been an ambitious programme of agricultural reform involving private firms NGOs and international charities The Rwandan government claims these reforms have been a resounding success tripling crop yields and helping to combat hunger Chris Huggins argues however that Rwanda s liberal modernising image sits poorly with the regime s continuing authoritarian tendencies Featuring in depth case studies of the effects of agricultural reform in three different regions and drawing on hundreds of interviews Huggins shows that the much vaunted liberalization of agriculture has in fact depended on the coercion of Rwandan farmers and in many cases has had a detrimental impact on their livelihoods With the Kagame regime now coming under increasing international scrutiny this work provides a timely look at the impact of market friendly authoritarianism in contemporary Africa making essential reading for students and scholars of development in the fields of sociology anthropology political science and economics

Chinese Foreign Policy Under Xi Tiang Boon Hoo,2017-02-17 There has been a discernable calibration of Chinese foreign policy since the ascension of Xi Jinping to the top leadership positions in China The operative term here is adjustment rather than renovation because there has not been a fundamental transformation of Chinese foreign policy or setting up of a new kitchen in foreign affairs Several continuities in Chinese diplomacy are still evident The People s Republic of China PRC has not wavered from its overarching strategy of rising through peaceful development The PRC is still an active participant and leader in or shaper of global and regional regimes even as it continues to push for reforms of the extant order towards an arrangement which it thinks will be less unjust and more equitable It seeks to better link up with the international track perhaps even more so under Xi s stewardship Yet amidst these continuities it is clear that there have been some profound shifts in China s foreign policy From the enunciation of strategic slogans such as the Asian security concept and major country diplomacy with Chinese characteristics the creation of the China led and initiated Asian Infrastructure Investment Bank the pursuit of Xi s signature foreign policy initiative the One Belt One Road to a purportedly more assertive and resolute defense of China s maritime territorial interests in East Asia examples of these foreign policy calibrations both patent and subtle abound In short this has not been a complete

metamorphosis but there are real changes with important repercussions for China and the international system The burning questions then are What Where How and Why What are these key foreign policy adjustments Where and how have these occurred in Chinese diplomacy And what are the reasons or drivers that inform these changes This book seeks to capture these changes Featuring contributions from academics think tank intellectuals and policy practitioners all engaged in the compelling business of China watching the book aims to shed more light on the calibrations that have animated China s diplomacy under Xi a leader who by most accounts is considered the most powerful Chinese numero uno since Deng Xiaoping

disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals

Prapimphan Chiengkul,2017-05-08 This book adopts a neo Marxist and Gramscian approach to studying the political economy of the agricultural and food system in Thailand 1990 2014 The author argues that hegemonic forces have many measures to co opt dissent into hegemonic structures and that counter hegemony should be seen as an ongoing process over a long period of time where predominantly counter hegemonic forces constrained by political economic structural conditions may at times retain some hegemonic elements Contrary to what some academic studies suggest the author argues that localist inspired social movements in Thailand are not insular and anti globalisation
