Living Matter: The Preservation of Biological Materials in Contemporary Art Rachel Rivenc, Kendra Roth, 2022-05-24 This innovative volume is the first to address the conservation of contemporary art incorporating biological materials such as plants foods bodily fluids or genetically engineered organisms Eggshells flowers onion peels sponge cake dried bread breast milk bacteria living organisms these are just a few of the biological materials that contemporary artists are using to make art But how can works made from such perishable ingredients be preserved And what logistical ethical and conceptual dilemmas might be posed by doing so Because they are prone to rapid decay even complete disappearance biological materials used in art pose a range of unique conservation challenges This groundbreaking book probes the issues associated with displaying collecting and preserving these unique works of art The twenty four papers from the conference present a range of case studies prominently featuring artists perspectives as well as conceptual discussions thereby affording a comprehensive and richly detailed overview of current thinking and practices on this topic *Living Matter* is the first publication to explore broadly the role of biological materials in the creative process and present a variety of possible approaches to their preservation The free online edition of this open access publication is available at www.getty.edu/publications/living_matter and includes videos and zoomable illustrations Also available are free PDF EPUB and Kindle MOBI downloads of the book

Self-Tracking Btihaj Ajana, 2017-10-01 This book provides an empirical and philosophical investigation of self tracking practices In recent years there has been an explosion of apps and devices that enable the data capturing and monitoring of everyday activities behaviours and habits Encouraged by movements such as the Quantified Self a growing number of people are embracing this culture of quantification and tracking in the spirit of improving their health and wellbeing The aim of this book is to enhance understanding of this fast growing trend bringing together scholars who are working at the forefront of the critical study of self tracking practices Each chapter provides a different conceptual lens through which one can examine these practices while grounding the discussion in relevant empirical examples From phenomenology to discourse analysis from questions of identity privacy and agency to issues of surveillance and tracking at the workplace this edited collection takes on a wide and yet focused approach to the timely topic of self tracking It constitutes a useful companion for scholars students and everyday users interested in the Quantified Self phenomenon [Phenomenology and Intercultural](#)

[Understanding](#) Kwok-Ying Lau, 2016-09-29 This book approaches the topic of intercultural understanding in philosophy from a phenomenological perspective It provides a bridge between Western and Eastern philosophy through in depth discussion of concepts and doctrines of phenomenology and ancient and contemporary Chinese philosophy Phenomenological readings of Daoist and Buddhist philosophies are provided the reader will find a study of theoretical and methodological issues and innovative readings of traditional Chinese and Indian philosophies from the phenomenological perspective The author uses a descriptive rigor to avoid cultural prejudices and provides a non Eurocentric conception and practice of philosophy Through

this East West comparative study a compelling criticism of a Eurocentric conception of philosophy emerges New concepts and methods in intercultural philosophy are proposed through these chapters Researchers teachers post graduates and students of philosophy will all find this work intriguing and those with an interest in non Western philosophy or phenomenology will find it particularly engaging

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren,2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

At the Center Casey Nelson Blake,Daniel H. Borus,Howard Brick,2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world awareness thinkers and artists sought to understand and secure principles that lay at the center of things From the onset of the Cold War in 1948 through 1963 they asked What defined the essential character of American culture Could permanent moral standards guide human conduct amid the flux and horrors of history In what ways did a stable self emerge through the life cycle Could scientific method rescue truth from error illusion and myth Are there key elements to democracy to the integrity of a society to order in the world Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale Yet other key figures rejected the search for a center asserting that freedom lay in the dispersion of cultural energies and the plurality of American experiences In probing the centering impulse of the era At the Center offers a unique perspective on the United States at the pinnacle of its power

Automation and Utopia John Danaher,2019-09-24 Automating technologies threaten to usher in a workless future But

this can be a good thing if we play our cards right Human obsolescence is imminent The factories of the future will be dark staffed by armies of tireless robots The hospitals of the future will have fewer doctors depending instead on cloud based AI to diagnose patients and recommend treatments The homes of the future will anticipate our wants and needs and provide all the entertainment food and distraction we could ever desire To many this is a depressing prognosis an image of civilization replaced by its machines But what if an automated future is something to be welcomed rather than feared Work is a source of misery and oppression for most people so shouldn't we do what we can to hasten its demise Automation and Utopia makes the case for a world in which free from need or want we can spend our time inventing and playing games and exploring virtual realities that are more deeply engaging and absorbing than any we have experienced before allowing us to achieve idealized forms of human flourishing The idea that we should give up and retreat to the virtual may seem shocking even distasteful But John Danaher urges us to embrace the possibilities of this new existence The rise of automating technologies presents a utopian moment for humankind providing both the motive and the means to build a better future Unknowning and the Everyday Seema Golestaneh, 2022-12-26 In Unknowning and the Everyday Seema Golestaneh examines how Sufi mystical experience in Iran shapes contemporary life Central to this process is *ma rifat* or unknowing the idea that as it is ultimately impossible to fully understand the divine humanity must operate from an engaged awareness that it knows nothing Golestaneh shows that rather than considering *ma rifat* an obstacle to intellectual engagement Sufis embrace that there will always be that which they do not know From this position they affirm both the limits of human knowledge and the mysteries of the profane world Through ethnographic case studies Golestaneh traces the affective and sensory dimensions of *ma rifat* in contexts such as the creation of collective Sufi spaces the interpretation of Persian poetry formulations of selfhood and non selfhood and the navigation of the socio material realm By outlining the relationship between *ma rifat* and religious aesthetic and social life in Iran Golestaneh demonstrates that for Sufis the outer bounds of human thought are the beginning rather than the limit **Realities in Pedagogical and Phenomenological Contexts** Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an

alternative to positivistic scientific idealistic or psychologistic approaches *The Evolution of Human Wisdom* Celia Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology LSA Bulletin Linguistic Society of America, 1996-10 *Passions of the Christ* F. Scott Spencer, 2021-05-04 Senior New Testament scholar F Scott Spencer focuses on a neglected area in the study of Jesus and the Gospels the emotional life of Jesus This book offers a fresh reading of the Gospels through the lens of Jesus s emotions anger grief disgust surprise compassion and joy These emotions motivate Jesus s mission and reveal to Gospel readers what matters most to him Amid his passions Jesus forges his character as God s incarnate Messiah wholly embodied and emotionally engaged with others and thoroughly embedded in the surrounding environment **Competition Law for the Digital Economy** Björn Lundqvist, Michal S. Gal, 2019-12-27 The digital economy is gradually gaining traction through a variety of recent technological developments including the introduction of the Internet of things artificial intelligence and markets for data This innovative book contains contributions from leading competition law scholars who map out and investigate the anti competitive effects that are developing in the digital economy *Exhibiting the Archive* Peter Lester, 2022-06-24 Exhibiting the Archive examines the role that exhibition plays in archives and analyses the impact they are understood to have on how users and visitors experience the archive Drawing on research conducted in Europe North America and Australia the book analyses the key theoretical and social influences on exhibition making in archives today and discusses the role of exhibitions in the archives of tomorrow This is the first in depth study to consider exhibition as more than outreach or advocacy it frames exhibition as an encounter with archives and with people and interprets it as a mechanism for change within the archive Against a backdrop of increasing digital activity Lester asks what experience within

the physical space of the archive could be Drawing on ideas of spatiality and embodiment as well as social justice and activism Lester considers the role of exhibitions within the physical archive and the part they can play in reshaping how experience is understood to happen within it Exhibiting the Archive offers a new perspective on the archive that will be of interest to academics and students engaged in the study of archives and records The discussions of cutting edge practice offer new insights into how exhibitions are conceived and made and will therefore be of interest to practitioners around the world

Reimagining Justice, Human Rights and Leadership in Africa Everisto Benyera, 2019-08-08 Failed attempts in Africa to develop democratised and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems

The Outlaw Ocean Ian Urbina, 2019-08-20 NATIONAL BESTSELLER A riveting adrenaline fueled tour of a vast lawless and rampantly criminal world that few have ever seen the high seas There are few remaining frontiers on our planet But perhaps the wildest and least understood are the world's oceans too big to police and under no clear international authority these immense regions of treacherous water play host to rampant criminality and exploitation Traffickers and smugglers pirates and mercenaries wreck thieves and repo men vigilante conservationists and elusive poachers seabound abortion providers clandestine oil dumpers shackled slaves and cast adrift stowaways drawing on five years of perilous and intrepid reporting often hundreds of miles from shore Ian Urbina introduces us to the inhabitants of this hidden world Through their stories of astonishing courage and brutality survival and tragedy he uncovers a globe spanning network of crime and exploitation that emanates from the fishing oil and shipping industries and on which the world's economies rely Both a gripping adventure story and a stunning exposé this unique work of reportage brings fully into view for the first time the disturbing reality of a floating world that connects us all a place where anyone can do anything because no one is watching

Marijuana David E. Newton, 2017-01-16 This single volume resource provides sound up to date information and authoritative resources for research on the controversial topics of the use of marijuana for medical and recreational purposes and the effects of marijuana use on society The use of marijuana has consistently been a highly controversial polarizing and emotional topic so much so that social cultural and religious factors have largely influenced public opinion legislation and law enforcement s treatment of marijuana use At the same time much of the scientific information about the plant has largely been ignored in the policies and practices of the United States over the past 100 years *Marijuana A Reference Handbook* provides detailed coverage of the history and background of marijuana use in society with special emphasis on the present day in the United States It outlines the development of federal and state legislation with respect to marijuana use over the last century focusing on changes that are taking place in the second decade of the 21st century and examines the pros and cons of the use of marijuana for a variety of purposes The book presents readers with unbiased research based information about the effects benefits and risks of marijuana use Readers will also learn about the role of hemp across human history and about very recent legislative action on the use of marijuana for both recreational purposes and medical use [A Legacy of Exploitation](#) Susan Dianne Brophy, 2022-05-15 It is unlikely that buyers of the Hudson s Bay Company s iconic multistripe point blanket these days reflect on the historically exploitative relationship between the company and Indigenous producers This critical re evaluation of the company s first planned settlement at Red River uncovers that history As a settler colonialist project par excellence the Red River Colony was designed to undercut Indigenous peoples troublesome autonomy and better control their labour Susan Dianne Brophy upends standard historical portrayals by foregrounding Indigenous peoples autonomy as a driving force of change *A Legacy of Exploitation* offers a comprehensive account of legal economic and geopolitical relations to show how autonomy can become distorted as complicity in processes of dispossession Ultimately this book challenges enduring yet misleading national fantasies about Canada as a nation of bold adventurers [Robotics, AI, and Humanity](#) Joachim von Braun, Margaret S. Archer, Gregory M. Reichberg, Marcelo Sánchez Sorondo, 2021-02-12 This open access book examines recent advances in how artificial intelligence AI and robotics have elicited widespread debate over their benefits and drawbacks for humanity The emergent technologies have for instance implications within medicine and health care employment transport manufacturing agriculture and armed conflict While there has been considerable attention devoted to robotics AI applications in each of these domains a fuller picture of their connections and the possible consequences for our shared humanity seems needed This volume covers multidisciplinary research examines current research frontiers in AI robotics and likely impacts on societal well being human robot relationships as well as the opportunities and risks for sustainable development and peace The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI robotics technologies are elaborated [Dramaturgies of Interweaving](#) Erika Fischer-Lichte, Christel Weiler, Torsten Jost, 2021-08-23

More Than a Feeling Adam J. Ramey,Jonathan D. Klingler,Gary E. Hollibaugh,2017-04-27 Whatever you think about the widening divide between Democrats and Republicans ideological differences do not explain why politicians from the same parties who share the same goals and policy preferences often argue fiercely about how best to attain them This perplexing misalignment suggests that we are missing an important piece of the puzzle Political scientists have increasingly drawn on the relationship between voters personalities and political orientation but there has been little empirically grounded research looking at how legislators personalities influence their performance on Capitol Hill With *More Than a Feeling* Adam J Ramey Jonathan D Klingler and Gary E Hollibaugh Jr have developed an innovative framework incorporating what are known as the Big Five dimensions of personality openness to experience conscientiousness extraversion agreeableness and neuroticism to improve our understanding of political behavior among members of Congress To determine how strongly individuals display these traits the authors identified correlates across a wealth of data including speeches campaign contributions and expenditures committee involvement willingness to filibuster and even Twitter feeds They then show how we might expect to see the influence of these traits across all aspects of Congress members political behavior from the type and quantity of legislation they sponsor and their style of communication to whether they decide to run again or seek a higher office They also argue convincingly that the types of personalities that have come to dominate Capitol Hill in recent years may be contributing to a lot of the gridlock and frustration plaguing the American political system
