**Emerging Dynamics of Sustainability in Multinational Enterprises** John R. McIntyre, Silvester Ivanaj, Vera Ivanaj, Rabi N. Kar, 2016-02-26 Economic development that meets the needs of the global population without jeopardizing the capacity of future generations is a worldwide challenge for multinational enterprises MNEs They are expected to balance their role as global economic actors and environmental stewards in the environment in which they operate Contributors from India Europe and the United States offer new perspectives contrasting US European and emerging economies approaches to sustainability and how they can generate roadmaps which yield innovative solutions for one of the most contentious issues of our era Their review suggests that the differential performance across developed and emerging economies has exposed potential weaknesses Emerging Dynamics of Sustainability in Multinational Enterprises promotes greater emphasis on experimenting with unique local and sustainable approaches to solving problems faced by firms in or from emerging economies This is a critical resource for researchers practitioners and policy makers concerned with sustainable development issues and a fresh reference for

graduate level students and academics focusing on corporate governance sustainable development and ethics as well as multinational enterprise management      **Global Innovation and Economic Value** Vijay Kumar,R. P. Sundarraj,2018-01-28 This book attempts to capture innovation outcomes The intent is on a holistic assessment of value creation by innovation the societal value that it delivers to humanity the economic value that it has the potential to endow to nations and the monetary value that it provides to innovating firms With a range of anecdotal examples and empirical analysis the book endeavours to answer the question Have investments in innovation paid off Big data and analytics underpin the development of the book material The coverage is truly global accentuating the economic value created by innovation in the technology and pharmaceutical sectors the two largest bastions of innovation In addition it includes numerous examples of successful innovation in global companies while analyzing its economic financial impact      *Banking Crises in Italy* Giuseppe Boccuzzi,2022-08-26 This book offers the first original study on banking crises management in Italy from 2014 to 2020 with a comprehensive overview of the resolution tools used In Italy the issue of banking crises is now the focus of attention not only as a result of the cycle of crises that occurred in the years 2014 2020 but also because of the banking reform carried out in Europe with the directives on bank recovery and resolution and the implementation of the Single Resolution Mechanism and the Single Resolution Fund within the framework of the Banking Union The Italian banking crises have been managed by applying the new European regulatory framework in this sense they constitute a significant test to assess its effectiveness and coherence This book divided into two parts makes an initial assessment of the crisis situations and the application of the new rules and offers an initial evaluation of their functioning In the first part an in depth examination is made of the various cases of crisis following a methodology of classification by type of solution and instruments adopted The second part is dedicated to lessons learned and open issues In detail the most sensitive issues of the current debate are addressed relating to the improvement of the institutional set up and the rules for crisis management the harmonization of insolvency rules in Europe the funding of resolution public intervention and finally the role of deposit guarantee systems An articulated and complex picture emerges with various areas for improvement and policy indications offering a framework that will be of interest to scholars researchers professors students and practitioners of banking and banking regulation      **The Oxford Handbook of International Law and Development** ,2023-11-11 Since the mid twentieth century international law and international development have become two of the most prominent secular languages through which aspirations about a better world are articulated They have shaped the both the treatment and self understanding of the developing world often by positing the West as a universal model against which developing states their citizens and natural environments should be measured and disciplined In recent years however critical scholars have investigated the deep linkages between the concept of development the doctrines and institutions of international law and broader projects of ordering at the international level They have shown how the leading models de radicalise if not derail initiatives to redefine development and pursue other

forms of global well being Bringing together scholars from both the Global South and the Global North the contributions in this Handbook invite readers to consider the limits of common normative and developmentalist assumptions At the same time the Handbook demonstrates how disparate but still identifiable set of ideas imaginaries norms and institutional practices related to law development and international governance shape today s profoundly unequal material conditions threatening the future of human and nonhuman life on the planet The book focuses on five distinct areas existing disciplinary frameworks institutions and actors regional theatres of international law and development competing social and economic agendas and alternative futures Offering a unique overview of the field of international law and development and assembling major critical historical and political economic insights this Handbook is an unmissable resource for scholars of international law international relations development studies and global history as well as anyone interested in the past present and future of our world

**Adapt and Be Adept** Terry L. Anderson, 2021-04-01 How can markets help us adapt to the challenges of climate change Editor Terry L Anderson brings together this collection of essays featuring the work of nine leading policy analysts who argue that market forces are just as important as government regulation in shaping climate policy and should be at the heart of our response to helping societies adapt to climate change Anderson notes in his introduction that most current climate policies such as the Paris Agreement require hard to enforce collective action and focus on reducing or mitigating greenhouse gases rather than adapting to their negative effects Adaptive actions can typically deliver much more faster and more cheaply than any realistic climate policy The authors tackle a range of issues the hidden costs of renewable energy sources the political obstacles surrounding climate change policy insurance and financial instruments for pricing risk of exposure to the effects of climate change and more Reliance on emerging renewable energies and a carbon tax are not enough to prevent the effects of global warming they argue We must encourage more private action and market incentives to adapt to a rapidly changing climate

**The Role of the Indian Ocean for Global Peace - Interdisciplinary Issues** Dr. (Capt.) Vivek Jain, 2023-11-02

This book deals with the various interdisciplinary issues of the Indian Ocean individually and collectively such as its history geography nautical elements economics trade routes old and new blue economy deep sea mining fisheries management tourism scourge of piracy pollution Law of the Sea UNCLOS 1982 and the different perspectives of its littoral countries on geopolitics international law international relations and maritime partnerships It is the most important ocean in the world 33% of the global population lives in the area and 50 60% of the world's maritime trade transits through it In addition around 60% of global oil and 26% of global gas reserves along with pristine beaches are located here To comprehend the interdisciplinary issues the editor embarked on a voyage to discover persuade and collaborate with exceptionally brilliant influential experts from prominent littoral countries India Indonesia Iran South Africa Malaysia and Singapore with relevant experience to expound the above subject areas In addition geopolitical conflicts hostilities and trade wars are on the rise war seems inevitable but not imminent Any conflict is likely to originate in other oceans and seas but will end up impacting the Indian Ocean's littoral countries Accordingly these countries must comprehend the interdisciplinary issues and the special role of the Indian Ocean to prevent all encompassing wars hostilities from widening at a global level and thereafter must flesh out plans to shield themselves They must also understand the area's role in working towards global peace by comprehending the above interdisciplinary issues The role of the Indian Ocean in global peace can only be achieved through maritime partnerships between its littoral countries and their avoidance of impulses to invite outside powers to balance each other's power However maritime partnerships are easier said than done At the very least the maritime partnership between two major Indian Ocean littoral powers India and Indonesia is critical to shield the region from geopolitical firestorms Hopefully this maritime partnership's tactic of embracing a carrot and stick approach will eventually persuade global powers from outside the Indian Ocean region to improve their conduct to achieve global peace

**OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Turkey** OECD, 2016-09-26

**The Third Pillar** Raghuram Rajan, 2020-02-25 Revised and updated Shortlisted for the Financial Times McKinsey Business Book of the Year Award From one of the most important economic thinkers of our time a brilliant and far seeing analysis of the current populist backlash against globalization Raghuram Rajan distinguished University of Chicago professor former IMF chief economist head of India's central bank and author of the 2010 FT Goldman Sachs Book of the Year Fault Lines has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics In The Third Pillar he offers up a magnificent

big picture framework for understanding how these three forces the state markets and our communities interact why things begin to break down and how we can find our way back to a more secure and stable plane The third pillar of the title is the community we live in Economists all too often understand their field as the relationship between markets and the state and they leave squishy social issues for other people That's not just myopic Rajan argues it's dangerous All economics is actually socioeconomics all markets are embedded in a web of human relations values and norms As he shows throughout history technological phase shifts have ripped the market out of those old webs and led to violent backlashes and to what we now call populism Eventually a new equilibrium is reached but it can be ugly and messy especially if done wrong Right now we're doing it wrong As markets scale up the state scales up with it concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose figuratively and even literally Instead Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest Rajan is not a doctrinaire conservative so his ultimate argument that decision making has to be devolved to the grass roots or our democracy will continue to wither is sure to be provocative But even setting aside its solutions The Third Pillar is a masterpiece of explication a book that will be a classic of its kind for its offering of a wise authoritative and humane explanation of the forces that have wrought such a sea change in our lives

Complexity and Crisis in the Financial System Matthew Holloway, Folarin Akinbami, Randal Michie, 2016-01-29 What are the long term causes and consequences of the global financial crisis of 2007-2008 This book offers a fresh perspective on these issues by bringing together a range of academics from law history economics and business to look in more depth at the changing relationships between crises and complexity in the US and UK financial markets The contributors are motivated by three main questions Is the present financial system more complex than in the past and if so why To what extent and in what ways does the worldwide financial crisis of 2007-2008 differ from past financial crises How can governments regulators and businesses better manage and deal with increased levels of complexity both in the present and in the future Students and scholars of finance economics history financial law banking and international business will find this book to be of interest It will also be of use to regulators and policymakers involved in the US and UK banking sectors **Controlling Capital**

Nicholas Dorn, 2016-02-12 Controlling Capital examines three pressing issues in financial market regulation the contested status of public regulation the emergence of culture as a proposed modality of market governance and the renewed ascendancy of private regulation In the years immediately following the outbreak of crisis in financial markets public regulation seemed almost to be attaining a position of command the robustness and durability of which is explored here in respect of market conduct European Union capital markets union and US and EU competition policies Subsequently there has been a softening of command and a return to public-private co-regulation positioned within a narrative on culture The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational

aspects stakeholder connivance and wider political embeddedness Lastly the book looks from both appreciative and critical perspectives at private regulation through financial market associations arbitration of disputes and most controversially market policing by hedge funds Bringing together a distinguished group of international experts this book will be a key text for all those concerned with issues arising at the intersection of financial markets law culture and governance *The India-US Partnership* Nish Acharya, 2016-05-12 The story of US India relations is one of unfulfilled potential Despite their common commitment to democracy diversity and free markets their short and long term objectives have not aligned in a way to create a robust economic and political partnership These two nations which will soon be the second and the third largest economies in the world must find ways to increase their economic integration over the next 15 years through institutional capacity building creating a startup culture and using India's talent pool to resolve complex global problems Engaging the question of bilateral partnership from the perspectives of investment public policy and philanthropy Acharya delves into ways in which India can approach the goal of 1 trillion worth of economic ties with the US by 2030 Backed by 62 interviews of leaders from business government civil society and the academia and 30 case studies on the growing impact of American organizations on the Indian economy and of Indians on the American economy this study highlights organizations that are inspirational models for their sectors and are aiming at realizing a trillion dollar long term economic partnership between India and America *Agriculture: Innovation, Strategy & Technology in 21st Century - Volume I* Dr. Anukrati Sharma Megha Goyal, Regional Research Frontiers - Vol. 2 Randall Jackson, Peter Schaeffer, 2017-04-17 This is the second volume in a two part series on frontiers in regional research It identifies methodological advances as well as trends and future developments in regional systems modelling and open science Building on recent methodological and modelling advances as well as on extensive policy analysis experience top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research Topics such as dynamic interindustry modelling computable general equilibrium models exploratory spatial data analysis geographic information science spatial econometrics and other advanced methods are the central focus of this book The volume provides insights into the latest developments in object orientation open source and workflow systems all in support of open science It will appeal to a wide readership from regional scientists and economists to geographers quantitatively oriented regional planners and other related disciplines It offers a source of relevant information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science economics and political science
