## **No Two Alike Human Nature And Human Individuality:**

No Two Alike: Human Nature and Human Individuality Judith Rich Harris, 2007-06-17 The author of the controversial book *The Nurture Assumption* tackles the biggest mystery in all of psychology What makes people differ so much in personality and behavior It can't just be nature and nurture because even identical twins who grow up together same genes same parents have different personalities And if psychologists can't explain why identical twins are different they also can't explain why each of us differs from everyone else Why no two people are alike Harris turns out to be well suited for the role of detective it isn't easy to pull the wool over her eyes She rounds up the usual suspects and shows why none of the currently popular explanations for human differences birth order effects for example or interactions between genes and environment can be the perpetrator she is looking for None of these theories can solve the mystery of human individuality The search for clues carries Harris into some fascinating byways of science The evidence she examines ranges from classic experiments in social psychology to cutting edge research in neuroscience She looks at studies of twins research on autistic children observations of chimpanzees birds and even ants Her solution is a startlingly original one the first completely new theory of personality since Freud's Based on a principle of evolutionary psychology the idea that the human mind is a toolbox of special purpose devices Harris's theory explains how attributes we all have in common can make us different This is the story of a scientific quest but it is also the personal story of a courageous and innovative woman who refused to be satisfied with what everyone knows is true

No Two Alike: Human Nature and Human Individuality Judith Rich Harris, 2010-02-15 A display of scientific courage and imagination William Saletan New York Times Book Review Why do people even identical twins reared in the same home differ so much in personality Armed with an inquiring mind and insights from evolutionary psychology Judith Rich Harris sets out to solve the mystery of human individuality

The Trouble with Trauma Michael Scheeringa, 2022-03-08 *The Trouble with Trauma* is the story of how the idea of psychological trauma appeals to the human mind Trauma impacts many people psychologically but the evidence on the long term physical effect is incomplete Theories that psychological trauma can permanently damage your brain cause physical disease and change your essential character have become staples of human thought worldwide Dr Scheeringa explains how those theories are widely believed whilst not being true and at the heart of the story is an explanation of how humans choose to ignore scientific evidence and practice self deception based on heuristics for survival Heuristics is a rapid and efficient method to make judgments about threatening situations which may be especially relevant during an epidemic and the spread of misinformation But *The Trouble with Trauma* is more than a critique of social policy This is a book for anyone who wants a better understanding on how groupthink and herd mentality works and improves our ability to understand scientific fact Dr Scheeringa sheds light on why we choose to ignore scientific evidence while engaging the reader in a lively conversation on how we come to believe

**Rebirthing into Androgyny** Berenice Andrews, 2012-11-14 In these interesting times when many people are searching

for spiritual nourishment this book is intended to be a means of providing it Rebirthing Into Androgyny Your Quest For Wholeness And Afterward offers to the hungry ones a familiar yet totally different feast While it sets forth an already established metaphysics it also presents a radical new ideaone that has been implicit in that spiritual thought but unavailable until now and the new awareness associated with quantum physics In other words while this book provides soul searchersalso known as learnerswith an ages old means of generating a fundamental inner change a rebirthing it also provides a new living prototype of what is being reborn Thus a persons rebirthing is both a gestation and a labor a quest producing an ever increasing knowing gnosis which gradually becomes being that can finally merge with the Beloved Self And the new living prototype is that of the human soul not as what a person has but as what a person is a creative energy being who generates its own bodies out of its soul substanceits creative consciousness energyby means of its archetypal human energy system while always being guided by its nucleus of divinity In this book which is a textbook for soul searchers all of this transformative change is offered explored and explained in a series of carefully crafted lessons lovingly taught by a shamanic teacher healer in a stone circle classroom the ancient site of a modern teaching There is a grand feast awaiting

**Grandchildren Redesigned** Michael Bess,2016-09-06 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will generate staggeringly complex and subtle

forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can t afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human **Against Absolute Goodness** Richard

Kraut,2011-12-02 Richard Kraut argues that goodness is not a reason giving property in fact there may be no such thing

**The Evolution of Personality and Individual Differences** David M. Buss,2011 Capturing a scientific change in thinking about personality and individual differences this volume provides theories and empirical evidence which suggest that personality and individual differences are central to evolved psychological mechanisms and behavioural functioning

**Chance, Character and Change** John Mattausch,2011-12-31 Chance is real Not only is it a cause of societal change but we as individuals are chance given characters who discover and build our character in chancy circumstances Chance is also expressed as coincidence and contingency expressions which have episodically been of undeniable historical importance Mattausch asserts the conventional picture of societal change is incorrect Societal change is not a linear succession with each phase of change replacing its predecessor Instead the process is one of accumulative change in which chance plays various roles Chance Character and Change develops the idea of chance situating it within the history of thought and social change By focusing strictly on manifestations of chance and of luck that can be seen and explained Mattausch is able to show how chance acts in the environment of evolution and the social practices that regulate the inheritance of knowledge and

technology This in turn steers societal change and how change itself occurs Chance's role is often characterized as coincidence or contingency and this automatically is seen as progressive or degenerate However Mattausch notes that accumulative change is potentially both progressive as well as decadent Chance also plays a part in the social aspects of our world customs practices cultures societies and politics When we act Mattausch argues we do not distinguish between good and bad but rather between determinism and chance the latter is a test of character not of free will This theory is general in its assertions and application and can be related to many areas of study from economic theory to human behavior to politics The rich texture of the writing and vivid use of examples from daily life and the work of other major thinkers draw in the reader The most striking aspect of this work is the author's writing style and the way he weaves together evidence classic research and contemporary thought It is skillfully effectively beautifully done

**The Nurture Assumption** Judith Rich Harris, 2009-02-24 This groundbreaking book a Pulitzer Prize finalist and New York Times notable pick rattled the psychological establishment when it was first published in 1998 by claiming that parents have little impact on their children's development In this tenth anniversary edition of *The Nurture Assumption* Judith Harris has updated material throughout and provided a fresh introduction Combining insights from psychology sociology anthropology primatology and evolutionary biology she explains how and why the tendency of children to take cues from their peers works to their evolutionary advantage This electrifying book explodes many of our unquestioned beliefs about children and parents and gives us a radically new view of childhood
