Windows on the Cross Tom Smail, 2004-02-25 Society today shows signs of disintegration Institutions such as the monarchy parliament and the Church itself have come under intense scrutiny and deeply disturbing weaknesses have been exposed We are bombarded with news of wars and injustice and the advance of science poses new moral dilemmas that leave us confused and looking for help In the midst of such perplexity Tom Smail invites us to survey the wondrous cross not he says to find instant answers to particular questions but so that we can find our bearings and our confidence in the way God deals with confusion and destructiveness in the world We can also discover there clues about how we might respond to the difficult situations we have to face The book examines many different perspectives on the cross from the New Testament themes of reconciliation sacrifice justice and freedom to the more contemporary approaches of sharing of suffering and victory over sin Throughout Tom Smail seeks to instruct and explain the biblical teaching unlocking its meaning and motivating us to a fresh devotional and practical response to what God has done for us in the death of Jesus *Windows on the Cross* contains questions at the end of each chapter and is ideal for reflective reading by individuals and groups It will be widely welcomed

and Learning Group at the Massachusetts Institute of Technology Their work has focused our attention on cognitive science ethnography sociology artificial intelligence and other related disciplines Crucially it has forced our awareness of the construction of computational settings as a crucial component of the struggle to understand how mathematical learning happens We have sometimes felt that few have tried to span both communities Indeed an analysis of the references in the literature would we are sure reveal that the two communities have often ignored each other's strengths One reason for writing this book is born of our hope that we might draw together Mathematics Educators and mathematics educators and assist both communities in recognising that there are insights that might be derived from each other

How Television Invented New Media Sheila C. Murphy, 2011-03-17 Now if I just remembered where I put that original TV play device the universal remote control Television is a global industry a medium of representation an architectural component of space and a nearly universal frame of reference for viewers Yet it is also an abstraction and an often misunderstood science whose critical influence on the development history and diffusion of new media has been both minimized and overlooked How Television Invented New

Media adjusts the picture of television culturally while providing a corrective history of new media studies itself. Personal computers, video game systems, even iPods and the Internet built upon and borrowed from television to become viable forms. The earliest personal computers disguised as video games using TV sets as monitors provided a case study for television's key role in the emergence of digital interactive devices. Sheila C. Murphy analyzes how specific technologies emerge and how representations from *South Park* to *Dr. Horrible's Sing-Along Blog* mine the history of television just as they converge with new methods of the making and circulation of images. Past and failed attempts to link television to computers and the Web also indicate how services like Hulu or Netflix On Demand can give rise to a new era for entertainment and program viewing online. In these concrete ways, television's role in new and emerging media is solidified and finally recognized.
