inherently spatial and discourse to conceptualise how big concepts such as empowerment are articulated materialised and experienced at the ground level Through this it gives voices to the marginalised who experience empowerment setting these within the context of their relations with the other stakeholders who shape this engagement This book contributes to broader critical social science debates around ethical development and questions of power and empowerment in development interventions This is critical to reducing the disconnection between policy aims and realities within development and empowerment initiatives as well as enabling ethical commodities to be strategic in retaining their appeal throughout their networks

'An Entirely Different World': Russian Visitors to the Cape 1797-1870 Boris Gorelik, 2015-11-01 The Russian view of the Cape as represented in this volume may be unique During the period in question Russia had no cultural political or economic ties with South Africa Russians saw the Cape only as a convenient stopover en route to the Far East to their country's distant domains that could not be reached by sea otherwise The Cape was one of the exotic lands they would visit on such journeys their first and only introduction to the African continent Although amazed and perplexed by the entirely different world they found here Russian travellers would often draw unexpected parallels between life in their motherland and the realities of the Cape Colony The selections include memoirs of such important Russian personalities as Yuri Lisiansky Vasily Golovnin Ivan Goncharov and Konstantin Posyet Most of the texts appear in English for the first time

Internet for the People Ben Tarnoff, 2022-06-14 For all the informational convenience the internet offers it is deeply flawed How can it be improved Writer Ben Tarnoff proposes one possibility in this intriguing book which urges the development of a public lane on the information superhighway It's worth checking out for yourself Seth MacFarlane Why is the internet so broken and what could ever possibly fix it In *Internet for the People* leading tech writer Ben Tarnoff offers an answer The internet is broken he argues because it is owned by private firms and run for profit Google annihilates your privacy and Facebook amplifies right wing propaganda because it is profitable to do so But the internet wasn't always like this it had to be remade for the purposes of profit maximization through a years long process of privatization that turned a small research network into a powerhouse of global capitalism Tarnoff tells the story of the privatization that made the modern internet and which set in motion the crises that consume it today The solution to those crises is straightforward deprivatize the internet Deprivatization aims at creating an internet where people and not profit rule It calls for shrinking the space of the market and diminishing the power of the profit motive It calls for abolishing the walled gardens of Google Facebook and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control To build a better internet we need to change how it is owned and organized Not with an eye towards making markets work better but towards making them less dominant Not in order to create a more competitive or more rule bound version of privatization but to overturn it Otherwise a small number of executives and investors will

continue to make choices on everyone's behalf and these choices will remain tightly bound by the demands of the market. It's time to demand an internet by and for the people now.

Inventing Wine: A New History of One of the World's Most Ancient Pleasures Paul Lukacs, 2013-10-21 Meticulously researched history looks at how wine and Western civilization grew up together. Dave McIntyre, Washington Post: "Because science and technology have opened new avenues for vintners, our taste in wine has grown ever more diverse. Wine is now the subject of careful chemistry and global demand. Paul Lukacs recounts the journey of wine through history: how wine acquired its social cachet; how vintners discovered the twin importance of place and grape; and how a basic need evolved into a realm of choice."
