**The Art and Archaeology of Human Engagements with Birds of Prey** Robert J. Wallis, 2023-10-05 Of all avian groups birds of prey in particular have long been a prominent subject of fascination in many human societies This book demonstrates that the art and materiality of human engagements with raptors has been significant through deep time and across the world from earliest prehistory to Indigenous thinking in the present day Drawing on a wide range of global case studies and a plurality of complementary perspectives it explores the varied and fluid dynamics between humans and birds of prey as evidenced in this diverse art historical and archaeological record From their depictions as powerful beings in visual art and their important roles in Indigenous mythologies to the significance of

their body parts as active agents in religious rituals the intentional deposition of their faunal remains and the display of their preserved bodies in museums there is no doubt that birds of prey have been figures of great import for the shaping of human society and culture However several of the chapters in this volume are particularly concerned with looking beyond the culture nature dichotomy and human centred accounts to explore perspectival and other post humanist thinking on human raptor ontologies and epistemologies The contributors recognize that human raptor relationships are not driven exclusively by human intentionality and that when these species meet they relate to and become with one another This raptor with human focused approach allows for a productive re framing of questions about human raptor interstices enables fresh thinking about established evidence and offers signposts for present and future intra actions with birds of prey
