Handbook of Integrated Circuit Industry Yangyuan Wang, Min-Hwa Chi, Jesse Jen-Chung Lou, Chun-Zhang Chen, 2023-11-27 Written by hundreds of experts who have made contributions to both enterprise and academics research these excellent reference books provide all necessary knowledge of the whole industrial chain of integrated circuits and cover topics related to the technology evolution trends fabrication applications new materials equipment economy investment and industrial developments of integrated circuits Especially the coverage is broad in scope and deep enough for all kinds of readers being interested in integrated circuit industry Remarkable data collection update marketing evaluation enough working knowledge of integrated circuit fabrication clear and accessible category of integrated circuit products and good equipment insight explanation etc can make general readers build up a clear overview about the whole integrated circuit industry This encyclopedia is designed as a reference book for scientists and engineers actively involved in integrated circuit research and development field In addition this book provides enough guide lines and knowledges to benefit enterprisers being interested in integrated circuit industry

Programming Massively Parallel Processors David B. Kirk, Wen-mei W. Hwu, 2012-12-31 Programming Massively Parallel Processors A Hands on Approach

Second Edition teaches students how to program massively parallel processors. It offers a detailed discussion of various techniques for constructing parallel programs. Case studies are used to demonstrate the development process which begins with computational thinking and ends with effective and efficient parallel programs. This guide shows both student and professional alike the basic concepts of parallel programming and GPU architecture. Topics of performance floating point format parallel patterns and dynamic parallelism are covered in depth. This revised edition contains more parallel programming examples commonly used libraries such as Thrust and explanations of the latest tools. It also provides new coverage of CUDA 5.0 improved performance enhanced development tools increased hardware support and more increased coverage of related technology OpenCL and new material on algorithm patterns GPU clusters host programming and data parallelism and two new case studies on MRI reconstruction and molecular visualization that explore the latest applications of CUDA and GPUs for scientific research and high performance computing. This book should be a valuable resource for advanced students software engineers programmers and hardware engineers. New coverage of CUDA 5.0 improved performance enhanced development tools increased hardware support and more. Increased coverage of related technology OpenCL and new material on algorithm patterns GPU clusters host programming and data parallelism. Two new case studies on MRI reconstruction and molecular visualization explore the latest applications of CUDA and GPUs for scientific research and high performance computing.

Computational Forensics Sargur N. Srihari, Katrin Franke, 2008-08-15 This Lecture Notes in Computer Science LNCS volume contains the papers presented at the Second International Workshop on Computational Forensics IWCF 2008 held August 7-8 2008. It was a great honor for the organizers to host this scientific event at the renowned National Academy of Sciences Keck Center in Washington DC USA. Computational Forensics is an emerging research domain focusing on the investigation of forensic problems using computational methods. Its primary goal is the discovery and advancement of forensic knowledge involving modeling computer simulation and computer based analysis and recognition in studying and solving forensic problems. The Computational Forensics workshop series is intended as a forum for researchers and practitioners in all areas of computational and forensic sciences. This forum discusses current challenges in computer assisted forensic investigations and presents recent progress and advances. IWCF addresses a broad spectrum of forensic disciplines that use computer tools for criminal investigation. This year's edition covers presentations on computational methods for individuality studies computer based 3D processing and analysis of skulls and human bodies shoe print preprocessing and analysis neural language analysis and information retrieval to support law enforcement analysis and group visualization of speech recordings scanner and print device forensics and computer based questioned document and signature analysis.
