Contemporary Perspectives on Research in Educational Assessment Dr. Myint Swe Khine, 2020-01-01
Assessment and evaluation have always been an integral part of the educational process. Quality and purposeful assessment can assist in students' learning and their achievement. While there has been a rapid growth in international standardized student assessments in the past few decades, a large number of education systems participating in these assessments are now focusing their attention on developing new national within-country assessments to evaluate educational standards and to modify the curriculum to better suit the demands of the 21st century. Education systems that are successful in linking the national curriculum and assessments directly to international standards are performing better on international standardized assessments of reading, mathematics, and science. This book covers studies related to educational assessment in addressing quality of education and performance improvement. The book presents the distinguished and exemplary works by educators and researchers in the field, highlighting the contemporary trends and issues, creative and unique approaches, innovative methods, frameworks, pedagogies, and theoretical and practical aspects in

assessment processes in various educational settings **Master the SSAT/ISEE: High School Entrance Exam Basics**
