TO TAKE DOWN M/TI AUTOMATIC (CLIP)
TO REMOVE THE OPERATING SLIDE

Place the receiver with the assembled parts inserted in the palm of the hand. Sweep the operating slide with the thumb and fingers of the right hand. Press one side of the operating slide outward with the thumb. At the same time, pressing the other side outward with the fingers. This operation disengages the tape on the ~~main~~ ^{upper} side of the frame of the operating slide from the ~~lower~~ ^{lower} side of the frame of the tape.

While still holding the operating slide with the right hand to prevent the operating slide spring from flying loose, lift the end of the operating slide with the left thumb, out of the belt and transfer through the clearance slots in the receiver, and slide the operating slide forward and off the operating slide guide stud, thus freeing the operating slide and operating slide spring.
