

WINCHESTER.

Model 59

Your WINCHESTER Model 59 is a new departure in self-loading shotguns built of the finest materials and to the strictest precision manufacturing specifications. As with all top quality products, proper care will guarantee its long life and continuously smooth, efficient and safe operation.

The bore of your Model 59 should be wiped free of any dampness with an oily patch and all exposed surfaces covered with a thin film of oil. After exposure to rain, snow or salt spray, you may wish to remove the chamber and trigger guard group for cleaning. Be sparing in your use of oil, however, for a little goes a long way and excessive oiling will cause an accumulation of dust and burnt powder that may cause malfunctions.

Once or twice during the shooting season wipe the chamber recess in the barrel and the outer surface of the independent chamber with an oily rag. A drop of oil every once in a while on the inertia rod, the slide cam of the bolt and the coils of the carrier spring will also help to keep the action in smoothest operating condition. Remove the trigger guard group and stand the gun up when performing this latter operation.

When storing for long periods, apply gun grease to the metal parts, and keep in a dry place. Do not plug the muzzle with any obstruction. Before firing, be certain all grease is wiped off . . . especially from the inside of the bore, chamber and action parts.

Should your firearm ever need repairs, return it to the WINCHESTER factory, where it will receive the same careful attention used in its manufacture.
