

2. INSTALLATION INSTRUCTIONS

ATTENTION: You are strongly advised to read this chapter thoroughly before installing your oscilloscope.

2.1 INITIAL INSPECTION

Check the contents of the shipment for completeness and note whether any damage has occurred during transport. If the contents are incomplete, or there is damage, a claim should be filed with the carrier immediately, and the Philips Sales or Service organisation should be notified in order to facilitate the repair or replacement of the instrument.

2.2 SAFETY INSTRUCTIONS

2.2.1 Earthing

Before any connection to the input connectors is made, the instrument shall be connected to a protective earth conductor via the three-core mains cable; the mains plug shall be inserted only into a socket outlet provided with a protective earth contact. The protective action shall not be negated by the use of an extension cord without protective conductor.

WARNING: Any interruption of the protective conductor inside or outside the instrument is likely to make the instrument dangerous. Intentional interruption is prohibited.

When an instrument is brought from a cold into a warm environment, condensation may cause a hazardous condition. Therefore, make sure that the earthing requirements are strictly adhered to.

2.2.2 Mains voltage cord and fuses.

Different power cords are available for the various local mains voltage outlets. The power cord version delivered is determined by the particular instrument version ordered.

NOTE: If the mains plug has to be adapted to the local situation, such adaptation should be done only by a qualified technician.

This oscilloscope has a mains switched-mode power supply that covers most nominal voltage ranges (in use: 100 V...240 V a.c., 0 m.a.s.). This obviates the need to adapt to the local mains voltage. The mains frequency range is 50 Hz...400 Hz.

WARNING: The instrument shall be disconnected from all voltage sources when replacing a fuse.

Mains fuse rating: 1.6 A delayed-action, 250 V.

The mains fuseholder is located on the rear panel (see Figure 2.1). If the mains fuse needs replacing, proceed as follows:

- remove the cover of the fuseholder by means of a screwdriver,
- fit a new fuse of the correct rating and refit the cover of the fuseholder.

WARNING: Make sure that only fuses of the required current and voltage rating, and of the specified type, are used for renewal. The use of the repaired fuses, and/or short-circuiting of the fuseholder, is prohibited.
