Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS), 2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces including in the intervention in Syria, the goals and results of recent state armament programmes and the trajectory of future developments. This full colour volume includes more than 50 graphics, maps and charts and over 70 images and contains chapters on Russia's armed forces since the end of the Cold War, Strategic forces, Ground forces, Naval forces, Aerospace forces, Russia's approach to military decision making and joint operations, Economics and industry. At a time when Russia's relations with many of its neighbours are increasingly strained and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state capabilities and future of Russia's armed forces. **Military Construction, Veterans Affairs, and Related Agencies Appropriations**

United States. Congress. House. Committee on Appropriations. Subcommittee on Military Construction, Veterans Affairs, and Related Agencies, 2016 **Yearbook of International Humanitarian Law, Volume 20, 2017** Terry D. Gill, Tim McCormack, Robin Geiß, Heike Krieger, Christophe Paulussen, 2018-12-20 The main theme of this volume of the Yearbook of International Humanitarian Law is the development and interpretation of international humanitarian law (IHL). It is elaborated upon in several chapters that examine the role of non-state armed groups in the development and interpretation of IHL, the impact of international criminal law on the development of IHL, the notion of external non-international armed conflicts and the regulation of prolonged occupation under international law. The second theme of this volume is dedicated to targeting in armed conflicts. Specific topics include precautions in attack in urban and siege warfare, the targeting of the Islamic State's religious personnel in Iraq and Syria and the targeting of illicit crops through aerial spraying in Colombia. Besides the chapters that address both themes, this volume also contains a Year in Review describing the most important events and legal developments that took place in 2017. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high quality peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

Army of None: Autonomous Weapons and the Future of War Paul Scharre, 2018-04-24 Winner of the 2019 William E. Colby Award. The book I had been waiting for. I can't recommend it highly enough. Bill Gates. The era of autonomous weapons has arrived. Today around the globe at least thirty nations have weapons that can search for and destroy enemy targets all on their own. Paul Scharre, a leading expert in next generation warfare, describes these and other high tech weapons systems.

from Israel's Harpy drone to the American submarine hunting robot ship Sea Hunter and examines the legal and ethical issues surrounding their use. A smart primer to what's to come in warfare. Bruce Schneier, Army of None, engages military history, global policy, and cutting edge science to explore the implications of giving weapons the freedom to make life and death decisions. A former soldier himself, Scharre argues that we must embrace technology where it can make war more precise and humane, but when the choice is life or death, there is no replacement for the human heart.

The South China Sea Arbitration Alfredo C. Robles, 2019-01-01. The South China Sea Arbitration, which marks the first time that the Philippines and China have been parties to a compulsory dispute settlement procedure, is a landmark legal case. The Tribunal tackled head-on critical issues in the interpretation and application of the UN Convention on the Law of the Sea that other international courts have failed to address, particularly the compatibility of historic rights with the Convention, the identification of maritime features as permanently submerged or above water at high tide, and the distinction between features that are fully entitled to maritime zones and those that are not. In addition, the Tribunal also had to decide on issues as diverse as near collisions at sea, illegal fishing of giant clams and sea turtles, and the destruction of fragile coral reefs resulting from island building. The Tribunal's task was rendered arduous by China's refusal to appear before it. In these circumstances, understanding the Tribunal's decisions is a challenging undertaking. China's public relations campaign targeting the proceedings raised issues that the layperson could readily grasp, notably African states' support for its non-appearance, the integrity of the judges, and the validity of arbitral awards. *Understanding the Awards and Debating with China* aims to facilitate understanding of the South China Sea Arbitration by presenting detailed summaries of the two Arbitral Awards. The author rebuts the questionable claims raised by China's public relations campaign and highlights China's covert actions during the proceedings.

Media Law in Greece Ioannis Iglezakis, 2021-12-21. Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this analysis of media law in Greece surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio, and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Greece will welcome this very useful guide, and academics and researchers will appreciate its value in the study of
