Sa Army Form 2015:

South Africa and United Nations Peacekeeping Offensive Operations Antonio Garcia, 2018-08-17 The creation of the Force Intervention Brigade FIB as the sharp tactical edge of the United Nations Stabilisation Mission in the Democratic Republic of the Congo MONUSCO tasked with the neutralising of armed groups was a watershed moment in the history of modern peace missions What was more significant was that sub Saharan national leaders were instrumental in the creation of the FIB South Africa Tanzania and Malawi but lacked the resources to deploy such a force and consequently the brigade was deployed under the banner of the UN With the legacy of an African Renaissance and its role in the conception of the FIB South Africa remains a critical player in international peace and security in sub Saharan Africa and therefore holds a key strategic role in achieving the FIBs objectives This comes at a critical time where blue helmets are increasingly exposed to complex and challenging security contexts The aim of this work is to provide a conceptual model for South African military future operations and UN offensive peacekeeping operations In this undertaking a layer of military and Clausewitzian theory is added to offensive peacekeeping operations Furthermore there are sections on operational constructs capstone and operating concepts doctrine and structural elements as well a section on mine action This book contributes towards an understanding of the nature of modern strategy through the lens of UN offensive peacekeeping operations and provides insights into operational challenges

Intra-Africa Migrations Inocent Moyo, Jussi P. Laine, Christopher Changwe Nshimbi, 2021-02-21 This book discusses regional and continental integration in Africa by examining the management of migration across the continent It examines borders and securitisation of migration and the challenges and opportunities that arise out of reconfigured continental demographics The book offers insights on intra Africa migrations and highlights how

intra continental migration creates socio economic and cultural borders It explores how these borders beyond the physical boundaries of states including the Berlin Conference constructed borders create cultural divides challenges for economic integration and cross border security and irregular migration patterns While the movement of economic goods is valued for regional economic integration the mobility of people is seen as a threat This approach to migration contradicts the intentions of true integration and development and triggers negative responses such as xenophobia that cannot be addressed by simply managing the physical border and allowing free movement This book engages in a pivotal discussion of these issues which are hitherto missing in African border studies by demonstrating the ubiquity and overreaching influence of various kinds of borders on the African continent With multidisciplinary contributions that provide an in depth understanding of intra Africa migrations and strategies for enhanced migration management this book will be a useful resource for scholars and students studying geography politics security studies development studies African studies and sociology **Military Review** ,2017

Fighting at the Legal Boundaries Kenneth Watkin, 2016 *Fighting at the Legal Boundaries* offers a holistic approach towards the application of the various constitutive parts of international law. The author focuses on the interaction between the applicable bodies of law by exploring whether their boundaries are improperly drawn or are being interpreted in too rigid a fashion. Emphasis is placed on the disconnect that can occur between theory and practice regarding how these legal regimes are applied and interact with one another. Through a number of case studies *Fighting at the Legal Boundaries* explores how the threat posed by insurgents, terrorists and transnational criminal gangs often occurs not only at the point where these bodies of law interact but also in situations where there is significant overlap. In this regard, the exercise of the longstanding right of States to defend nationals, including the conduct of operations such as hostage rescue, can involve the application of human rights based law enforcement norms to counter threats transcending the conflict spectrum. **Fees**

Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top-down leadership system of university management and its double-speak of professing to act in workers and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt. *South African Army Vision 2020* Len Le Roux, 2007

Fighting at the Legal Boundaries Kenneth Watkin OMM, CD, QC, 2016-05-03 The international law governing armed conflict is at a crossroads as the formal framework of laws designed to control the exercise of self-defence and conduct of inter-state conflict finds itself confronted with violent 21st Century disputes of a very different character. Military practitioners who seek to stay within the bounds of international law often find themselves applying bodies of law: IHL, IHL, ICL in an exclusionary fashion and adherence to those boundaries can lead to a formal and often rigid application of the law that does not adequately address contemporary security challenges. *Fighting at the Legal Boundaries* offers a holistic

approach towards the application of the various constitutive parts of international law The author focuses on the interaction between the applicable bodies of law by exploring whether their boundaries are improperly drawn or are being interpreted in too rigid a fashion Emphasis is placed on the disconnect that can occur between theory and practice regarding how these legal regimes are applied and interact with one another Through a number of case studies Fighting at the Legal Boundaries explores how the threat posed by insurgents terrorists and transnational criminal gangs often occurs not only at the point where these bodies of law interact but also in situations where there is significant overlap In this regard the exercise of the longstanding right of States to defend nationals including the conduct of operations such as hostage rescue can involve the application of human rights based law enforcement norms to counter threats transcending the conflict spectrum This book has five parts Part I sets out the security legal and operational challenges of contemporary conflict Part II focuses on the interaction between the jus ad bellum humanitarian law and human rights including an analysis of the historical influences that shaped their application as separate bodies of law Emphasis is placed on the influence the proper authority principle has had in the human rights based approach being favored when dealing with criminal non State actors during both international and non international armed conflict Part III analyzes the threats of insurgency and terrorism and the state response This includes exploring their link to criminal activity and the phenomenon of transnational criminal organizations Part IV addresses the conduct of operations against non State actors that span the conflict spectrum from inter state warfare to international law enforcement Lastly Part V looks at the way ahead and discusses the approaches that can be applied to address the evolving diverse and unique security threats facing the international community

South Yemen's Independence Struggle Anne-Linda Amira Augustin,2021-11-30 A bold firsthand account of one of the persistent Arab uprisings in Yemen At its beginning in 2007 the Southern Movement in South Yemen was a loose merger of different people most of them former army personnel and state employees of the People s Democratic Republic of Yemen PDRY who were forced from their jobs after the war in 1994 only four years after the unification between the PDRY and the Yemen Arab Republic This bold ethnographic account of a persistent Arab uprising in a rarely studied corner of the Middle East explores why the Southern Movement has grown so tremendously during the last decade and how it developed from a primarily social movement demanding social rights into a mass protest movement claiming independence for a state that had long vanished from the world map Anne Linda Amira Augustin asks why so many young people born after 1990 joined the movement and demanded the re establishment of a state that they had never themselves experienced At the core of South Yemeni resistance lies the transmission from generation to generation of a dominant counternarrative which may be seen as the continuation and rehabilitation of the PDRY s national narrative This narrative amplified through everyday communication in families and neighborhoods but also by media makers journalists school and university teachers civil society actors and by the movement s activists opposes the national unity narrative of the Republic of Yemen and

intensifies the demands for an independent state *Male Rape, Masculinities, and Sexualities* Aliraza Javaid, 2018-10-08

This book critically explores the intersections between male rape masculinities and sexualities. It examines the ways in which male rape is policed, responded to and addressed by state and voluntary agencies in Britain. The book uncovers how notions of gender, sexualities and masculinities shape these agencies' understanding of male rape and their views of men as victims of rape. Javaid pays particular attention to the police and deconstructs police subculture to consider whether it influences and shapes the ways in which police officers provide services for male rape victims. Grounded in qualitative interviews and data derived from the state and voluntary sector, this book will be invaluable reading for sociologists, criminologists and social scientists who are keen to learn more about gender policing, sexual violence and male sexual victimisation. **Writing**

Namibia Sarala Krishnamurthy, Nelson Mlambo, Helen Vale, 2022-06-01 A rich collection of captivating and remarkable chapters. *Writing Namibia: Coming of Age* presents research of senior academics as well as emerging scholars from Namibia. The book includes wide-ranging topics in literature written in English and other Namibian languages such as German, Afrikaans and Oshiwambo. Almost thirty years after independence, Namibia literature has come of age with new writers experimenting with different genres and varied aspects of literature. As an aesthetic object and social phenomenon, Namibian literature still fulfils the function of social conscience and as new writers emerge, there is ample demonstration that plural as they are, Namibian literary texts relate in a complex manner to the socio-historical trends shaping the country. The Namibian literary critical tradition continues to paint some versions of Namibia and what we find in this new and highly welcome volume is a canvas of rich voices and perspectives that demonstrate an intricate diversity in terms of culture, language and themes.
