Nursing & Healthcare Ethics - E-Book Simon Robinson, Owen Doody, 2021-03-08 Now in its sixth edition, this highly popular text covers the range of ethical issues affecting nurses and other healthcare professionals. Authors Simon Robinson and Owen Doody take a holistic and practical approach focused in the dialogue of ethical decision making and how this connects professional leadership and governance ethics in the modern healthcare environment. This focuses on the responsibility of professionals and leaders and the importance of shared responsibility in the practice of healthcare. With a foreword by the eminent medical ethicist Alastair Campbell, the revised edition includes contemporary topics such as the duty of candour, recent cases such as the Mid Staffs scandal, and ethical perspectives on vulnerable groups such as persons with intellectual learning disability, dementia, and those with an enduring mental illness. It builds on professional identity and personal development as part of ongoing learning, individual and organizational, and provides interactive ways that help the reader to develop reflective ethical practice. This text aims to enable ethical engagement with the ever-changing healthcare environment and is a must-have for anyone serious about ethics in healthcare. Holistic and practice-relevant approach. New perspectives on vulnerable groups such as persons with intellectual learning disability, dementia, and those with an enduring mental illness. Descriptive, including moral psychology, as well as normative ethical theory. Promoting dialogue and engagement with practice practitioners, patients, and families. Development of professional ethical skills. Connecting professional ethics to leadership, governance, and social ethics. Highly accessible format. Case studies. Scenarios presented within chapters and pause for thought exercises to promote dialogue and engagement. Suitable for pre/post-registration nurses, students, health care professionals.

the nurse memoirs including public response to volunteer wartime nursing the organisation of the military health services of the three nations and their conduct in the war and changes in the post war organization of public health services and the professionalization of nursing

British Army Veterans' Experiences of the Transition into Civilian Life Emma Armstrong, 2025-02-04 Over the last few decades the academic and public gaze has increasingly focused on military veterans The extant literature has documented a wealth of problems that emerge once a service leaver enters civilian life including homelessness mental health issues criminality and substance misuse Accordingly the intention to improve the wellbeing of veterans in the UK has certainly been evident within various government initiated strategies However most scholarly attention has concentrated on the few veterans who encounter these extreme transitions This book sheds light on the vast majority who are deemed to have an unproblematic transition on account of their employment status and lack of serious social or health issues by drawing on data from 58 interviews with Army veterans spouses of Army veterans and charity workers By mapping participants trajectory from pre military life to years after service a holistic theorisation of the transition is provided using the tenets of ultra realism It shows that for most merely being in employment was not an accurate measure of success Instead entrance to the civilian job market was characterised by precarity and intense competition between employees This served as a dichotomy to the work environment veterans were familiar with and caused tension between the subject and the ideology they were assimilated to In putting forward this argument this book advances the existing ultra realist theoretical framework and veteran research in an empirically informed manner

A National Trauma Care System National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on the Health of Select Populations, Board on Health Sciences Policy, Committee on Military Trauma Care's Learning Health System and Its Translation to the Civilian Sector, 2016-09-12 Advances in trauma care have accelerated over the past decade spurred by the significant burden of injury from the wars in Afghanistan and Iraq Between 2005 and 2013 the case fatality rate for United States service members injured in Afghanistan decreased by nearly 50 percent despite an increase in the severity of injury among U S troops during the same period of time But as the war in Afghanistan ends knowledge and advances in trauma care developed by the Department of Defense DoD over the past decade from experiences in Afghanistan and Iraq may be lost This would have implications for the quality of trauma care both within the DoD and in the civilian setting where adoption of military advances in trauma care has become increasingly common and necessary to improve the response to multiple civilian casualty events Intentional steps to codify and harvest the lessons learned within the military's trauma system are needed to ensure a ready military medical force for future combat and to prevent death from survivable injuries in both military and civilian systems This will require partnership across military and civilian sectors and a sustained commitment from trauma system leaders at all levels to assure that the necessary knowledge and tools are not lost A National Trauma Care System defines the components of a learning health system necessary to enable continued

improvement in trauma care in both the civilian and the military sectors This report provides recommendations to ensure that lessons learned over the past decade from the military's experiences in Afghanistan and Iraq are sustained and built upon for future combat operations and translated into the U S civilian system
