Robles, 2019-01-01 The South China Sea Arbitration which marks the first time that the Philippines and China have been parties to a compulsory dispute settlement procedure is a landmark legal case The Tribunal tackled head on critical issues in the interpretation and application of the UN Convention on the Law of the Sea that other international courts have failed to address particularly the compatibility of historic rights with the Convention the identification of maritime features as permanently submerged or above water at high tide and the distinction between features that are fully entitled to maritime zones and those that are not In addition the Tribunal also had to decide on issues as diverse as near collisions at sea illegal fishing of giant clams and sea turtles and the destruction of fragile coral reefs resulting from island building The Tribunals task was rendered arduous by Chinas refusal to appear before it In these circumstances understanding the Tribunals decisions is a challenging undertaking Chinas public relations campaign targeting the proceedings raised issues that the layperson could readily grasp notably African states support for its non appearance the integrity of the judges and the validity of arbitral awards Understanding the Awards and Debating with China aims to facilitate understanding of the South China Sea Arbitration by presenting detailed summaries of the two Arbitral Awards The author rebuts the questionable claims raised by Chinas public relations campaign and highlights Chinas covert actions during the proceedings **Army of None: Autonomous Weapons and the Future of War** Paul Scharre, 2018-04-24 Winner of the 2019 William E Colby Award The book I had been waiting for I can t recommend it highly enough Bill Gates The era of autonomous weapons has arrived Today around the globe at least thirty nations have weapons that can search for and

destroy enemy targets all on their own Paul Scharre a leading expert in next generation warfare describes these and other high tech weapons systems from Israel s Harpy drone to the American submarine hunting robot ship Sea Hunter and examines the legal and ethical issues surrounding their use A smart primer to what s to come in warfare Bruce Schneier Army of None engages military history global policy and cutting edge science to explore the implications of giving weapons the freedom to make life and death decisions A former soldier himself Scharre argues that we must embrace technology where it can make war more precise and humane but when the choice is life or death there is no replacement for the human heart

Black and Indigenous Resistance in the Americas Juliet Hooker, 2020-03-04 Black and Indigenous Resistance in the Americas is an essential roadmap to understanding contemporary racial politics across the Americas where openly white supremacist politics are on the rise It is the product of a multiyear transnational research project by the Anti racist Research and Action Network of the Americas in collaboration with resistance movements confronting racial retrenchment in Brazil Bolivia Chile Colombia Guatemala Mexico and the United States How did we get here And what anti racist strategies are equal to the dire task of confronting resurgent racism This volume provides powerful answers to these pressing questions 1 It traces the making and contestation of state led racial projects in response to black and indigenous mobilization during an era of expansion of multicultural rights in the context of neoliberal capitalism 2 It identifies the origins and manifestations of the backlash against hard fought but hardly far reaching gains by marginalized peoples showing that contrary to critiques of identity politics the losses and anxieties produced by the failures of neoliberalism have been understood in racial terms 3 It distills a path forward for progressive anti racist activism in the Americas that looks beyond state centered rights seeking strategies and instead situates a critique of racial capitalism as central to the contestation of white supremacy
