Naval Powers in the Indian Ocean and the Western Pacific Howard M. Hensel,Amit Gupta,2018-05-11 A vital component of the interdependent global economy maritime transit routes are nowhere more critical than those traversing the Indian Ocean and the Western Pacific Previously areas of the Indian Ocean and Western Pacific have been viewed as separate and discrete political economic and military regions In recent years however a variety of economic political and military forces have created a new understanding of these maritime expanses as one zone of global interaction This book complements the material presented in its companion volume Maritime Security in the Indian Ocean and the Western Pacific by analysing the perceptions interests objectives maritime capabilities and policies of the major maritime powers operating in the Indian Ocean and the Western Pacific In addition the book also assesses the contemporary maritime challenges and opportunities that confront the global community within what is rapidly becoming recognised as an integrated zone of global interaction A valuable study for researchers and policymakers working in the fields of maritime security military security and peace studies conflict resolution and Asian affairs

Microbial BioTechnology for Sustainable Agriculture Volume 1 Naveen Kumar Arora,Brahim Bouizgarne,2022-05-03 This volume explains the recent findings on the mutualistic plant microbe interactions and how they can be utilized for sustainable agriculture practices including land reclamation The book covers mainly plant growth promoting microorganisms PGPMs including both the symbiotic bacteria and fungi and their role in mobilization of nutrients providing protection to the crops from phytopathogens and abiotic stresses PGPMs play important roles in survival and health of the plant These useful microorganisms provide plants with nutrients protect them from pathogens and help them combat abiotic stresses It is important that these mutualistic interactions between plant and soil microbes are well understood so as to develop reliable products in the form of biostimulants and biopesticides as well as managing biotic and abiotic stresses in crops Apart from enhancing crop productivity plant microbe interactions can also perform activities such as reclamation of degraded lands degradation of pollutants and remediation of saline or marginal lands This book is of interest to teachers researchers plant scientists and microbiologists Also the book serves as additional reading material for undergraduate and graduate students of agriculture microbiology biotechnology ecology soil science and environmental sciences

Precise Chemical Application Technology for Horticultural Crops Xiaolan Lv,Andreas Herbst ,Jianli Song,Xue Li,2024-06-03 Plant chemical protection uses professional spraying machines to transport chemicals such as pesticides and herbicides to the target sites for pest disease and weed control in crop production Such practices play a vital role in ensuring the supply of food fruits and vegetables for human beings However traditional plant chemical application methods suffer from excessive pesticide use low utilization rate and high labor intensity due to the backwardness of the existing sprayers the single atomization technology etc In order to boost the progress of modern agriculture plant

chemical protection should be oriented toward efficient accurate and intelligent application technologies and equipment Smart chemical application technology and efficient equipment can effectively reduce pesticide usage mitigate the harm of chemicals to the environment and lower labor intensity realizing the sustainable development of disease and pest control of horticultural crops ensuring food safety and maintaining crop yield and quality *Illusions of Location Theory:*

Consequences for Blue Economy in Africa Francis Onditi, Douglas Yates, 2021-01-05 *Illusions of Location Theory*

Consequences for Blue Economy in Africa questions the relevance of location theory in explaining the coastal hinterland continuum and the implications for the utilization of blue economy ecosystem in such a contested space in Africa It pays more attention to territorial contestations maritime disputes vulnerabilities of landlocked states and expansionist policies as displayed through spatial organizational regimes These areas of investigation have previously been largely studied from the narrow perspective of location unduly focusing on comparative advantages of distance while neglecting the influence of forces such as technology ideology and the power of mental mapping in spatial decision making This volume puts forward the argument that the harmonious relationship between states and efficient exploitation of the blue economy ecosystem in ways that promote peace between states lies not only in the structural transformation of markets but also in bridging the spatial and social divide between the coastal and hinterland societies Thus this work proffers possibilities for a holistic regime for managing Africa's coastal hinterland continuum through innovative strategies such as SMART blue economies and the infusion of the geopolitical dimension into the management of maritime and territorial diplomacy The combination of theoretical and empirical analysis buttressed by in depth case studies of what works in the management of blue economy ecosystem and what does not work make this volume ideal for researchers students and practitioners interested in African regional studies African political economy political geography strategic military studies governance of seas and oceans and maritime science diplomacy **Advanced Microbial Biotechnologies For Sustainable Agriculture** Ying Ma, Miroslav Vosatka, Christopher Rensing, Helena Freitas, 2021-05-25
