Valuation Theory and Its Applications

Franz-Viktor Kuhlmann,Salma Kuhlmann,Murray Marshall,2002-01-01 This book is the first of two proceedings volumes stemming from the International Conference and Workshop on Valuation Theory held at the University of Saskatchewan Saskatoon SK Canada Valuation theory arose in the early part of the twentieth century in connection with number theory and has many important

applications to geometry and analysis the classical application to the study of algebraic curves and to Dedekind and Prüfer domains the close connection to the famous resolution of the singularities problem the study of the absolute Galois group of a field the connection between ordering valuations and quadratic forms over a formally real field the application to real algebraic geometry the study of noncommutative rings etc The special feature of this book is its focus on current applications of valuation theory to this broad range of topics Also included is a paper on the history of valuation theory The book is suitable for graduate students and research mathematicians working in algebra algebraic geometry number theory and mathematical logic

A Primer on Physical-Layer Network Coding Soung Chang Liew, Lu Lu, Shengli Zhang, 2022-05-31 The concept of physical layer network coding PNC was proposed in 2006 for application in wireless networks Since then it has developed into a subfield of communications and networking with a wide following This book is a primer on PNC It is the outcome of a set of lecture notes for a course for beginning graduate students at The Chinese University of Hong Kong The target audience is expected to have some prior background knowledge in communication theory and wireless communications but not working knowledge at the research level Indeed a goal of this book course is to allow the reader to gain a deeper appreciation of the various nuances of wireless communications and networking by focusing on problems arising from the study of PNC Specifically we introduce the tools and techniques needed to solve problems in PNC and many of these tools and techniques are drawn from the more general disciplines of signal processing communications and networking PNC is used as a pivot to learn about the fundamentals of signal processing techniques and wireless communications in general We feel that such a problem centric approach will give the reader a more in depth understanding of these disciplines and allow him/her to see first hand how the techniques of these disciplines can be applied to solve real research problems As a primer this book does not cover many advanced materials related to PNC PNC is an active research field and many new results will no doubt be forthcoming in the near future We believe that this book will provide a good contextual framework for the interpretation of these advanced results should the reader decide to probe further into the field of PNC

Numerical Methods for Partial Differential Equations Seymour V. Parter, 2014-05-10 Numerical Methods for Partial Differential Equations is a collection of papers dealing with techniques and practical solutions to problems concerning continuum mechanics fluid dynamics and plasma physics One paper discusses the important considerations that lead to an efficient nonlinear dynamic finite element analysis using improved analysis techniques Another paper describes the results obtained from fully discrete methods of higher order in time order 3 and 4 for second order parabolic initial boundary value problems in which the equations have time dependent or nonlinear coefficients Another paper reviews concepts of ellipticity of finite difference approximations to general elliptic partial differential systems with examples utilizing Cauchy Riemann equations or Navier Stokes equations One paper describes fluid dynamic computing using basic equations boundary conditions time dependent gas dynamics shock waves stream function vorticity methods and an example on the formation of

a spherical vortex Another paper evaluates a specific problem arising in the study of the equilibrium of plasma confined in a machine of the Tokomak type The collection is suitable for mathematicians physicists and investigators in the field of continuum mechanics fluid dynamics plasma physics Technical Education Great Britain.
