Department of Defence, 2016 *In Different Times* Ian van der Waag, Albert Grundlingh, 2019-11-15 This is the first attempt to bring together diverse scholars using different lenses to study South Africa s Border War As a book it is critical in approach provides deeper reflection and focuses specifically on the SADF experience of the war The result is a more complex picture of the war s dynamics and its legacies Although South Africa is a vastly different country today the study of the Border War opens a range of questions also relevant to contemporary deployments such as in Lesotho 1998 and the Central African Republic 2013 It includes the debate on participation in foreign conflicts on the deployment design and preparation of appropriate modern armed forces and their use as foreign policy instruments in far off theatres on military planning and as the historical controversies regarding the battles at Cuito Cuanavale and Bangui illustrate on the interface between foreign campaigning and domestic politics

Allies in Air Power Steven Paget, 2021-01-04 In the past century multinational military operations have become the

norm but while contributions from different nations provide many benefits from expanded capability to political credibility they also present a number of challenges Issues such as command and control communications equipment standardization intelligence logistics planning tactics and training all require consideration Cultural factors present challenges as well particularly when language barriers are involved In *Allies in Air Power* experts from around the world survey these operations from the birth of aviation to the present day Chapters cover conflicts including World War I multiple theaters of World War II the Korean War the Vietnam War the Gulf War Kosovo the Iraq War and various United Nations peacekeeping missions Contributors also analyze the role of organizations such as the UN NATO and so called coalitions of the willing in laying the groundwork for multinational air operations While multinational military action has become commonplace there have been few detailed studies of air power cooperation over a prolonged period or across multiple conflicts The case studies in this volume not only assess the effectiveness of multinational operations over time but also provide vital insights into how they may be improved in the future

 Martínez-Álvarez, Šime Ungar, 2021-07-22 With the development of Big Data platforms for managing massive amount of data
 and wide availability of tools for processing these data the biggest limitation is the lack of trained experts who are qualified
 to process and interpret the results This textbook is intended for graduate students and experts using methods of cluster
 analysis and applications in various fields Suitable for an introductory course on cluster analysis or data mining with an in
 depth mathematical treatment that includes discussions on different measures primitives points lines etc and optimization
 based clustering methods Cluster Analysis and Applications also includes coverage of deep learning based clustering
 methods With clear explanations of ideas and precise definitions of concepts accompanied by numerous examples and
 exercises together with Mathematica programs and modules Cluster Analysis and Applications may be used by students and
 researchers in various disciplines working in data analysis or data science Cyber Resilience Sergei Petrenko, 2022-09-01
 Modern cyber systems acquire more emergent system properties as far as their complexity increases cyber resilience
 controllability self organization proactive cyber security and adaptability Each of the listed properties is the subject of the

cybernetics research and each subsequent feature makes sense only if there is a previous one Cyber resilience is the most important feature of any cyber system especially during the transition to the sixth technological stage and related Industry 4.0 technologies Artificial Intelligence AI Cloud and foggy computing 5G IoT IIoT Big Data and ETL Q computing Blockchain VR AR etc We should even consider the cyber resilience as a primary one because the mentioned systems cannot exist without it Indeed without the sustainable formation made of the interconnected components of the critical information infrastructure it does not make sense to discuss the existence of 4.0 Industry cyber systems In case when the cyber security of these systems is mainly focused on the assessment of the incidents probability and prevention of possible security threats the cyber resilience is mainly aimed at preserving the targeted behavior and cyber systems performance under the conditions of known about 45 % as well as unknown the remaining 55 % cyber attacks This monograph shows that modern Industry 4.0 Cyber systems do not have the required cyber resilience for targeted performance under heterogeneous mass intruder cyber attacks The main reasons include a high cyber system structural and functional complexity a potential danger of existing vulnerabilities and sleep hardware and software tabs as well as an inadequate efficiency of modern models methods and tools to ensure cyber security reliability response and recovery

Creating Dynamic Space in Higher Education: Modern Shifts in Policy, Competencies, and Governance Areba, George Ngwacho, Gisore, Billiah Nyamoita, Njurai, Evelyn Wanjiru, 2024-11-22 The 21st century has brought transformative changes to higher education reshaping how institutions approach research teaching and learning Shifts in policies competencies and the integration of technology have redefined the landscape which has pushed higher education to adapt to new demands With increasing globalization and digitization universities and colleges face challenges in aligning their structures with the needs of a rapidly evolving labor market and society **Creating Dynamic Space in Higher Education Modern Shifts in Policy Competencies and Governance** examines the critical shifts reshaping higher education including governance changes digital transformation globalization and evolving instructional practices With contributions from field experts this volume offers practical strategies case studies and insights on addressing financial challenges adapting roles and developing competencies for the future workforce This book is ideal for education managers instructors policymakers and researchers seeking to navigate these changes and optimize their institutions for the future

US Grand Strategy in the 21st Century A. Trevor Thrall, Benjamin H. Friedman, 2018-01-29 This book challenges the dominant strategic culture and makes the case for restraint in US grand strategy in the 21st century Grand strategy meaning a state's theory about how it can achieve national security for itself is elusive That is particularly true in the United States where the division of federal power and the lack of direct security threats limit consensus about how to manage danger This book seeks to spur more vigorous debate on US grand strategy To do so the first half of the volume assembles the most recent academic critiques of primacy the dominant strategic perspective in the United States today The contributors challenge the notion that US national security requires a massive military huge defense spending and

frequent military intervention around the world The second half of the volume makes the positive case for a more restrained foreign policy by excavating the historical roots of restraint in the United States and illustrating how restraint might work in practice in the Middle East and elsewhere The volume concludes with assessments of the political viability of foreign policy restraint in the United States today This book will be of much interest to students of US foreign policy grand strategy national security and International Relations in general

Defence Industries in the 21st Century Çağlar Kurç, Richard A. Bitzinger, Stephanie G. Neuman, 2021-05-13 Defence Industries in the 21st Century explores the transformation in the global defence industrial production through examining the interaction between international and domestic factors With the global defence industry and arms market likely continue to expand and mature the ways in which this progression could influence international politics remain obscure In practice as the contents of this book show the defence industrial bases and arms export policies of emerging states display significant variance This variance is the result of a unique balance between domestic and international factors that has shaped the defence industrialisation behaviour and policies of the less industrialised states One of the most important conclusions of the book is that the interplay between domestic and international factors clearly influences the variation in the emerging states defence industrialisation policies as well as their success or failure While international factors create opportunities they also limit the options available to emerging economies Domestic factors also play an important role by shaping the policy choices of the states decision makers Exploring the balance between international and domestic factors and the ways in which they influence defence industrialisation in emerging states Defence Industries in the 21st Century will be of great interest to scholars of Defence Industries Arms Manufacturing and Defence Strategic and Security Studies more generally The chapters were originally published in Defence Studies Comparative Strategy and All Azimuth
