Law, Regulation and Governance in the Information Society Maurizio Borghi, Roger Brownsword, 2022-12-30 This edited collection seeks to map the landscape of contemporary informational interests to evaluate a range of recognised and putative rights and wrongs associated with modern information societies and to consider how law regulation and governance should be deployed in response New technologies and new applications constantly disrupt our values our framing of our world and our sense of where we are and who we are In our information societies we entertain mixed hopes and expectations as well as significant fears and concerns At the root of these there are a number of informational interests on the basis of which certain rights are claimed and particular wrongs denounced This book addresses these interests considering them as relating primarily to the integrity of the informational ecosystem to the accessibility accuracy and authenticity of public information and to our individual ability to control the outward and inward flows of information that relates directly to ourselves Covering a wide range of subjects the book's interrogation of our contemporary information society is oriented around two questions first whether the information society in which we live is the kind of society that we think it should be and second if not what we can reasonably expect law regulation and governance to do in providing the basis for improving it This book will be of considerable interest to those working at the intersection of law and technology as well as others concerned with the legal political and social aspects of our information society

Walker, Neville A. Stanton, Paul M. Salmon, 2018-04-17 A potentially troubling aspect of modern vehicle design some would argue is a trend for isolating the driver and reducing vehicle feedback usually in the name of comfort and refinement but increasingly because of automation There is little doubt cars have become more civilised over the years yet despite this the consequences of driver behaviour remain to a large extent anecdotal Readers will have heard such anecdotes for themselves They usually take the form of drivers of a certain age recalling their first cars from the 1970s or 80s in which doing 70 mph really felt like it The question is whether such anecdotes actually reflect a bigger more significant issue that could be better understood

Related questions have been explored in other domains such as aviation where the change to fly by wire did indeed bring about some occasionally serious performance issues that were not anticipated. Despite some clear parallels, automotive systems have been left relatively unstudied. The research described in this book aims to explore precisely these issues from a Human Factors perspective. This means connecting the topics of vehicle feel, vehicle dynamics, and automotive engineering with the latest research on driver situation awareness. The problem is explored experimentally from a variety of theoretical viewpoints, but the outcomes are consistently practical. Here we have a promising new avenue along which the driver experience can be enhanced in novel and insightful ways. Tools and templates are provided so that engineers and designers can try different ways to boost vehicle safety, efficiency, and enjoyment from a human-centered perspective.

Association of American Publishers AAP Finalist for the 2019 PROSE Award. Features diagnosis of how vehicle feel impacts driver situation awareness and how this could aid future vehicle designs. Multi-theory approach to driver situation awareness and how different views of this important concept give rise to different insights. Comprehensive analysis of situation awareness in driving, the information requirements of drivers, and how these needs can be supported. Practical descriptions of how state-of-the-science Human Factors methods have been applied in practice.

Scientific Foundations and Practical Applications of Periodization G. Gregory Haff, 2024-02-26

The concept of periodization is not new, with the precursors of periodized training dating back more than 2,000 years ago. But it is now obvious that the holistic development of an athlete encompasses more than their physical and tactical training. *Scientific Foundations and Practical Applications of Periodization* is the first book of its kind, designed to optimize sport performance by integrating both classic and modern periodization theories with recovery methodologies, nutritional interventions, and athlete monitoring guidelines. Written by G. Gregory Haff, a world-leading expert on periodization, *Scientific Foundations and Practical Applications of Periodization* incorporates the latest scientific evidence to provide a comprehensive understanding of how to implement planning and programming strategies to enhance physiological adaptations. While other periodization books may discuss training theory, few provide information on how to integrate various training models into the periodization process. Here are just some of the approaches incorporated into *Scientific Foundations and Practical Applications of Periodization*: Employing and blending parallel, sequential, and emphasis periodization models to develop athletes; Syncing recovery strategies with various phases and periods of training to enhance the adaptational process; Manipulating nutritional strategies to magnify performance; Using and interpreting monitoring data to adjust an athlete's program in accordance with the periodized plan. Applicable for athletes at all levels and in any sport, *Scientific Foundations and Practical Applications of Periodization* translates the latest research into usable information that directly enhances programming. You will have access to real-world practical examples and discussions of how to make scientifically sound programming decisions. A glossary of over 400 terms will help you digest the content. Plus, you will find periodization templates and directions on how to use them to create annual training, mesocycle, and microcycle plans.
