Determinations of the National Mediation Board United States. National Mediation Board, 1994 *Federal Register*, 2013-06 **Airline and Railroad Labor and Employment Law**, 1996 *Federal aviation regulations* United States. Federal Aviation Administration, 1995 **The Seven Year-Old Pilot** Capt. Steven Archille, 2012-03-23 Flying has been my dream since before I can remember literally My Aunt Odette tells me that when I was three years old she took me with her to the Port au Prince International Airport to pick someone up and when I saw an airliner up close for the first time I excitedly yelled out I want to drive that I don't recall that event but it serves as evidence that my fascination with flying began at a remarkably young age My first memory of wanting to fly came a few years later at the age of seven I was on my very first flight from Port au Prince to New York City where I was going to start a new life in a new country I remember looking at all the people boarding the airplane and wondering how that big silver bird was going to get us into the air that silver bird was an American Airlines Boeing 727 To this day the whole experience is vivid in my mind being greeted with a smile by the captain at the aircraft entry door the funny feeling in my stomach as the plane accelerated down the runway leaping into the air and my utter disbelief that we didn't drop out of the sky I was mesmerized by it all and by the time the plane came to a stop at our gate my dream had been born I wanted to become an airline pilot I have been blessed to be living that dream since 1999 It's a dream from which I hope never to awaken This is the story of the lifelong journey I have taken in realizing that dream I invite you to come along with me as we go from my birth in Haiti to the present day as I live my dream every day You will come with me as I move to America at the age of seven a country I knew nothing about and whose language I didn't speak a land that would truly prove to be the land of opportunity You will feel my sense of wonder and bewilderment growing up in New York City trying to understand my new world You will face my struggles to fit in with the kids in the housing project where my family lived for a decade as Mom and Dad saved money to buy a house You will meet my parents who encouraged my dream of flying and my fifth grade teacher who helped me to see that it was possible not only to dream it but also to achieve it It's a story of potential fulfilled and my family's sacrifices to get me through college and flight school You will fly with me from my first lesson to my first airline job as a copilot to the day I earned my four stripes and first heard someone call me Captain You will sit with me in the captain's seat as I fly an airline jet over Haiti for the first time looking down from thirty eight thousand feet onto the land of my birth where my dream had been born You will soar with me over the majestic Amazon jungle in Brazil over the desert flanked Nile River in Egypt and the sparkling Mediterranean Sea You will fly with me through New York City blizzards Indian monsoons and Arabian sandstorms You will travel with me on adventures to Europe South America the Middle East South Asia the Caribbean and other parts of the world I used to dream of going to as a child places that have affected me profoundly and where I left a little part of myself I have seen all these things through the eyes of the seven year old boy from Haiti that I was and in many ways still am the little boy who had a sense of just how

incredible the world and life are who dreamt of a life of worldwide adventure and was blessed to have his dream come true That is the reason for the title of this book *The Seven Year Old Pilot* because even after years of flying around the world in many ways I still feel like that little boy and I always try to approach my travels and my life with his sense of gratitude amazement and awe I truly believe that every one of us has life experiences and lessons worth sharing that can inspire enlighten teach and benefit others because we have all lived

**The Limits of Expertise** Dr Loukia D Loukopoulos, Mr Benjamin A Berman, Dr R Key Dismukes, 2012-10-01 *The Limits of Expertise* reports a study of the 19 major U S airline accidents from 1991 2000 in which the National Transportation Safety Board NTSB found crew error to be a causal factor Each accident is reported in a separate chapter that examines events and crew actions and explores the cognitive processes in play at each step

**Mergent Transportation Manual**, 2002 *Safety Recommendation*, 1993 *The Dragon in the Cockpit* Hung Sying Jing, Allen Batteau, 2016-03-23 The purpose of *The Dragon in the Cockpit* is to enhance the mutual understanding between Western aviation human factors practitioners and the Chinese aviation community by describing some of the fundamental Chinese cultural characteristics pertinent to the field of flight safety China's demand for air transportation is widely expected to increase further and the Chinese aviation community are now also designing their own commercial aircraft the COMAC C 919 Consequently the interactions in the air between the West and China are anticipated to become far more extensive and dynamic However due to the multi faceted nature of Chinese culture it is sometimes difficult for Westerners to understand Chinese thought and ways sometimes to the detriment of aviation safety This book provides crucial insights into Chinese culture and how it manifests itself during flight operations as well as highlighting ways in which Western technology and Chinese culture clash within the cockpit Science and technology studies STS have demonstrated that sophisticated technologies embed cultural assumptions usually in subtle ways These cultural assumptions bite back when the technology is used in an unfamiliar cultural context By creating the insider's perspective on the cultural technological assumptions of the world's fastest growing industrial economy this book seeks to minimize the accidents and damage resulting from technological cultural misunderstandings and misperceptions

**Moody's Transportation Manual**, 2000 *National Transportation Safety Board Decisions* United States. National Transportation Safety Board, **Aircraft Accident Report**, 197? **Aircraft Accident Report** United States. National Transportation Safety Board, 2007 On August 27 2006 about 0606 35 eastern daylight time Comair flight 5191 a Bombardier CL 600 2B19 N431CA crashed during takeoff from Blue Grass Airport Lexington Kentucky The flight crew was instructed to take off from runway 22 but instead lined up the airplane on runway 26 and began the takeoff roll The airplane ran off the end of the runway and impacted the airport perimeter fence trees and terrain The captain flight attendant and 47 passengers were killed and the first officer received serious injuries The airplane was destroyed by impact forces and postcrash fire The flight was operating under the provisions of 14 Code of Federal Regulations Part 121 and was en route to Hartsfield Jackson Atlanta International Airport Atlanta

Georgia Night visual meteorological conditions prevailed at the time of the accident The National Transportation Safety Board determines that the probable cause of this accident was the flight crewmembers failure to use available cues and aids to identify the airplane s location on the airport surface during taxi and their failure to cross check and verify that the airplane was on the correct runway before takeoff Contributing to the accident were the flight crew s nonpertinent conversation during taxi which resulted in a loss of positional awareness and the Federal Aviation Administration s FAA failure to require that all runway crossings be authorized only by specific air traffic control ATC clearances The safety issues discussed in this report focus on the need for 1 improved flight deck procedures 2 the implementation of cockpit moving map displays or cockpit runway alerting systems 3 improved airport surface marking standards and 4 ATC policy changes in the areas of taxi and takeoff clearances and task prioritization Safety recommendations concerning these issues are addressed to the FAA P x
