Human Factors in Intelligent Transportation Systems Woodrow Barfield, Thomas A. Dingus, 2014-01-14 The Intelligent Transportation System ITS Program is a cooperative effort by government private industry and academia to apply advanced technology to the task of resolving the problems of surface transportation The objective is to improve travel efficiency and mobility enhance safety conserve energy provide economic benefits and protect the environment The current demand for mobility has exceeded the available capacity of the roadway system Because the highway system cannot be expanded except in minor ways the available capacity must be used more efficiently to handle the increased demand ITS applies advanced information processing communication sensing and computer control technologies to the problems of surface transportation Considerable research and development efforts will be required to produce these new technologies and to convert technologies developed in the defense and space programs to solve surface transportation problems ITS has been subdivided into six interlocking technology areas This book addresses human factors concerns for four of these areas Advanced Traveler Information Systems are a variety of systems that provide real time in vehicle information to drivers regarding navigation and route guidance motorist services roadway signing and hazard warnings Advanced Vehicle Control Systems refer to systems that aid drivers in controlling their vehicle particularly in emergency situations and ultimately taking over some or all of the driving tasks Commercial Vehicle Operations address the application of ITS technologies to the special needs of commercial roadway vehicles including automated vehicle identification location weigh in motion clearance sensing and record keeping Advanced Traffic Management Systems monitor control and manage traffic on streets and highways to reduce congestion using vehicle route diversion automated signal timing changeable message signs and priority control systems Two technical areas are not specifically addressed in individual chapters but many aspects of them are covered in associated chapters Advanced Rural Transportation Systems include systems that apply ITS technologies to the special needs of rural systems and include emergency notification and response vehicle location and traveler information Advanced Public Transportation Systems enhance the effectiveness attractiveness and economics of public transportation and include fleet management automated fare collection and real time information systems **Engine Emissions** George

Springer,2012-12-06 In recent years emissions from transportation engines have been studied widely because of the contribution of such engines to atmospheric pollution During this period the amounts of pollutants emitted the mechanism of their formation and means of controlling emissions have been investigated in industrial and government laboratories as well as at universities The results of these investigations have generally been published as individual articles in journals transactions meeting proceedings and frequently in company reports This proliferation of technical information makes it difficult for workers in the field to keep abreast of all developments For this reason the editors felt the need for a book which would survey the existing state of knowledge in wide albeit selected areas and would provide a guide to the relevant literature This book is intended to fulfill this function It is recognized that all aspects of transportation engine emissions cannot be explored in a single volume In this book attention is focused primarily on sources and mechanisms of emission formation within the combustion process and on measurement techniques Beyond this objective no restrictions were placed on the authors Within the framework of the general theme each author has been free to treat his subject as he saw fit The editors have not strived to replace by uniformity the highly personal and attractive divergences of style Considerable efforts were made however to ensure clarity and minimum overlap between the chapters
