Two-Phase Flow in Refrigeration Systems Junjie Gu, Shujun Wang, Zhongxue Gan, 2013-08-17 Two Phase Flow in Refrigeration Systems presents recent developments from the authors extensive research programs on two phase flow in refrigeration systems This book covers advanced mass and heat transfer and vapor compression refrigeration systems and shows how the performance of an automotive air conditioning system is affected through results obtained experimentally and theoretically specifically with consideration of two phase flow and oil concentration. The book is ideal for university postgraduate students as a textbook researchers and professors as an academic reference book and by engineers and Fleets Go Green Christoph Herrmann, Mark Stephan Mennenga, Stefan Böhme, 2018-06-11 The designers as handbook book presents the results of the research project Fleets Go Green from different engineering disciplines It includes comprehensive empirical data as well as different methods and tools for evaluating and integrating electric vehicles into corporate fleets Finally the authors give recommendations for fleet owners vehicle manufacturers and political decision The aim of the joint research project Fleets Go Green was the integrated analysis and evaluation of the environmental performance of electric and plug in hybrid vehicles in everyday usage on the example of fleet operations. The potential of electric vehicles for reducing the harmful environmental impacts of road transport in everyday conditions can only be analyzed and evaluated in field tests If electric vehicles should realize their potential to reduce emissions and minimize the Sustainability in Energy and Buildings John consumption of resources an integrated life cycle assessment is required Littlewood, Robert J. The work begins with an

overview of Energy Technologies for a Sustainable Future which examines the correlation between population economy and energy consumption in the past and reviews the conventional and renewable energy sources as well as the management of them to sustain the ever growing energy demand in the future The rest of the chapters are divided into 3 parts the first part of the book Energy Sources Technologies and Environment consists of 12 chapters which include research on new energy technologies and evaluation of their environmental effects The second part Advanced Energy Materials includes 7 chapters devoted to research on material science for new energy technologies The final section titled Energy Management Economics and Policy is comprised of 10 chapters about planning controlling and monitoring energy related processes together with the policies to satisfy the needs of increasing population and growing economy. The chapters are selected works from the International Conference on Energy and Management which was organized by Istanbul Bilgi University Department of Energy Systems Engineering and PALMET Energy to share the knowledge on the recent trends scientific developments innovations and management methods in energy and held on 5 7th June 2014 at Istanbul Bilgi University **Register** ,2013-06 Automotive Air Conditioning Quansheng Zhang, Shengbo Eben Li, Kun Deng, 2016-08-10 This book presents research advances in automotive AC systems using an interdisciplinary approach combining both thermal science and automotive engineering It covers a variety of topics such as control strategies optimization algorithms and diagnosis schemes developed for when automotive air condition systems interact with powertrain dynamics In contrast to the rapid advances in the fields of building HVAC and automotive separately an interdisciplinary examination of both areas has long been neglected. The content presented in this book not only reveals opportunities when interaction between on board HVAC and powertrain is considered but also provides new findings to achieve performance improvement using model based methodologies Proceedings of the 4th International Conference on Industrial Engineering Andrey A. Sikdar, Frank Princiotta, 2021-01-31 Volume 2 of verglichen Advances in Carbon Management Technologies has 21 chapters It presents the introductory chapter again for framing the challenges that confront the proposed solutions discussed in this volume Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low carbon footprint of the generation of power heat and co products and of recovery and reuse of biomass wastes for beneficial purposes Section 5 provides potential carbon management solutions in urban and manufacturing environments This section also provides state of the art of battery technologies for the transportation sector The chapters in section 6 deals with electricity and the grid and how decarbonization can be practiced in the electricity sector The overall topic of advances in carbon management is too broad to be covered in a book of this size It was not intended to cover every possible aspect that is relevant to the topic Attempts were made however to highlight the most important issues of decarbonization from technological viewpoints Over the years carbon intensity of products and processes has decreased but the proportion of energy derived from fossil fuels has been stubornly stuck at about 80% This has occurred despite very rapid development of renewable fuels because at the same time the use of fossil fuels has also increased Thus the challenges are truly daunting It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve While policy decisions are the driving forces for technology development the book was not designed to cover policy solutions **Powertrain Systems for a Sustainable Future** Institution of Mechanical Engineers (IMechE),2023-12-04 The transport sector continues to shift towards alternative powertrains particularly with the UK Government's focus on ending the sale of petrol and diesel passenger cars by 2030 and increasing support for alternatives Despite this announcement the internal combustion could continue to play a significant role both in the passenger car market

through the use of hybrids and sustainable low carbon fuels including hydrogen as well as a key role in other sectors such as heavy duty vehicles and off highway applications across the globe The contributions presented at the International Conference on Powertrain Systems for a Sustainable Future 2023 London UK 29 30 November 2023 focus on the internal combustion engine s role in net zero transport as well as covering developments in the wide range of propulsion systems available electric hydrogen internal combustion engines and fuel cells sustainable fuels etc and their associated powertrains To achieve a sustainable future for transport across the globe we will need to deploy all technologies and so to help understand how these might fit together life cycle analysis of future powertrain systems and energy will also be included Powertrain Systems for a Sustainable Future provides a forum for engine fuels e machine fuel cell and powertrain experts to look closely at developments in powertrain technology required to meet the demands of the net zero future and global competition in all sectors of the road transportation off highway marine and stationary power industries Technologies for Electric and Hybrid Vehicles Jesús Manuel González Pérez, 2018-10-17 This book is a printed edition of the Special Issue Emerging Technologies for Electric and Hybrid Vehicles that was published in energies Advances in New Heat Transfer Fluids Alina Adriana Minea, 2017-03-16 Heat transfer enhancement has seen rapid development and widespread use in both conventional and emerging technologies Improvement of heat transfer fluids requires a balance between experimental and numerical work in nanofluids and new refrigerants Recognizing the uncertainties in development of new heat transfer fluids Advances in New Heat Transfer Fluids From Numerical to Experimental Techniques contains both 18th World Hydrogen Energy Conference 2010 - WHEC 2010 Detlef theoretical and practical coverage Stolten, Bernd Emonts, 2012 **Energy Star and Other Voluntary Programs 2001 Annual Report**,
