Handbook of Disaster and Emergency

Management (Second Edition) Amir Khorram-Manesh, Krzysztof Goniewicz, Attila Hertelendy, Maxim Dulebenets, 2021-10-06 Disasters and public health emergencies are increasing Climate change transportation incidents increasing numbers of mass gatherings chemical and technical incidents increasing number of armed conflicts and terrorism are some of the major reasons for this increasing pattern Any of these events may result in severe casualties destruction of infrastructures and create a situation in which the number of victims may exceed available resources Much of the knowledge in disaster medicine is based on the lessons learned However it has been proven that no lessons learned theoretically can be of practical use if the knowledge is not tested in an appropriate environment In this perspective the major clinical excellence and testing laboratories for disaster response are the scenes where disasters happen Yet most of the research and reports in the field are produced in high income countries while most of the disasters happen in middle or low income countries There

is thus a need to bring these two environments together in order to translate theory into practice and among people who are highly exposed and involved in the multidisciplinary management of a disaster or major incident Advances in Future Computer and Control Systems David Jin,Sally Lin,2012-04-13 FCCS2012 is an integrated conference concentrating its focus on Future Computer and Control Systems Advances in Future Computer and Control Systems presents the proceedings of the 2012 International Conference on Future Computer and Control Systems FCCS2012 held April 21 22 2012 in Changsha China including recent research results on Future Computer and Control Systems of researchers from all around the world
