Buck, 2017-09-25 Antarctica the high seas and deep seabed the atmosphere and space are increasingly accessible and exploited resource domains Collectively known as the global commons they represent a new and profound challenge for international law and institutions In *The Global Commons* Susan Buck considers the unique physical legal management and policy problems associated with these areas The book is a clear useful introduction to the subject that will be of interest to general readers as well as to students in international relations international law and environmental law and policy *Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 1* Ganesh Shivakoti, Ujjwal Pradhan, Helmi Helmi, 2016-09-01 *Redefining Diversity and Dynamics of Natural Resources Management in Asia Volumes 1-4* brings together scientific research and policy issues across various topographical areas in Asia to provide a comprehensive overview of the issues facing the region *Sustainable Natural Resources Management in Dynamic Southeast Asia Volume 1* pulls together regional experts in the field to look specifically at sustainability issues across the region to see what has been implemented what the impacts have been and what other options are available In the race to be a developed region many Southeast Asian countries have foregone natural resources through haphazard use As a result the people are faced with numerous environmental challenges particularly

deforestation and forest degradation biodiversity loss and ecosystem degradation reduction in soil quality and decreases in the quantity of available water Community based forest management is the involvement of local communities in the protection conservation and management of public forests to prevent degradation through sustainable practices while still responding to the basic social and economic needs of local populations When the people who depend on forest resources for their livelihoods are jointly responsible for managing and protecting them they tend to do so in a more sustainable manner by focusing on the long term benefits rather than the immediate short term gains However when tenure rights are weak unclear or insecure or offer limited benefits people are incited in extracting more immediate benefits resulting in suboptimal forest management and the reduction of carbon stocks Features case studies that cover issues such as rising levels of deforestation forest degradation regional food security ecosystem degradation biodiversity loss conflicts over natural resource use water management issues and impacts on local communities Includes contributions from local researchers who are dealing with these issues first hand and on a daily basis Includes a comparative review on REDD implementation in different communities Focuses on sustainability issues across the region Politics of Water Conservation Saurabh Gupta, 2015-10-01 This book examines the politics of rural development with special reference to watershed development interventions in the desert province of Rajasthan in India Watershed development and rainwater harvesting is one of the most significant rural development interventions in rainfed areas of India since the early 1990s A range of developmental actors including the state watershed department international donors NGOs and grassroots organisations are involved in sponsoring watershed development projects Using multi sited ethnography and conversational interviews with the deliverers as well as recipients of development the book compares and contrasts the watershed interventions of the state and two different kinds of NGOs in Rajasthan While conventional studies on watershed development have focused on the evaluation of success or failure of particular projects whether implemented by the state or NGOs the book moves beyond this narrow analytical gaze to look at the roles agendas and interests of multiple development agencies often partnering together and sometimes competing with each other as part of what the author calls the watershed development regime Taking cue from watershed development and water conservation projects over the last two decades the book engages with the larger question of how of delivering development It examines the complex processes of cooperation competition negotiations contestations and conflicts between different stakeholders including the agents of development and differently positioned rural social groups in the context of Rajasthan The book demonstrates that the recent interventions in watershed development and rainwater harvesting have considerably shaped the politics of development in Rajasthan in a number of ways by becoming a site for the remaking of the state and its internal relations by disturbing the local hegemony in the countryside by creating new relations of patronage between diverse agents and recipients of development by increasing the associational capacity as well as creating new conflicts intra and inter village and by initiating competition and cooperation between the various agents of development

Local Commons and Global Interdependence Robert O Keohane, Elinor Ostrom, 1994-11-15 This volume offers a synthesis of what is known about very large and very small common pool resources Individuals using commons at the global or local level may find themselves in a similar situation At an international level states cannot appeal to authoritative hierarchies to enforce

agreements they make to cooperate with one another In some small scale settings participants may be just as helpless in calling on distant public officials to monitor and enforce their agreements Scholars have independently discovered self organizing regimes which rely on implicit or explicit principles norms rules and procedures rather than the command and control of a central authority The contributors discuss the possibilities and dangers of scaling up and scaling down They explore the impact of the number of actors and the degree of heterogeneity among actors on the likelihood of cooperative behaviour Routledge Handbook of the Study of the Commons Blake Hudson,Jonathan Rosenbloom,Dan Cole,2019-01-04 This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
