Running Record Toddler Routines:

Observing and Recording the Behavior of Young Children Dorothy H. Cohen, Virginia Stern, Nancy Balaban, 1997

This thoroughly revised and updated fourth edition outlines methods for keeping records that provide a realistic picture of a child's interactions and experiences in the classroom. Numerous records of teachers' observations of children from birth to age 8, some retained from previous editions and some newly added to reflect today's early childhood settings, enrich this work and make it concrete, accessible, and fun to read. *Observing and Recording the Behavior of Young Children, 6th Edition*

Virginia Stern, Nancy Balaban, Nancy Gropper, Dorothy H. Cohen, 2016. In the Sixth Edition of their classic text, the authors reiterate the critical importance of observing and recording the behaviour of young children, especially in the current atmosphere of accountability and testing. In addition, because children with special needs are now widely included in a majority of early childhood classrooms, they have completely rewritten a chapter to focus more broadly on observing behaviours that may be viewed as disquieting. Designed to help teachers better understand children's behaviour, the book outlines methods for recordkeeping that provide a realistic picture of each child's interactions and experiences in the classroom. Numerous examples of teachers' observations of children from birth to age 8 enrich this work and make it accessible, practical, and enjoyable to read. With over 130,000 copies in print, this valuable resource for pre- and in-service educators features fresh information about how children think and learn, how their language develops, and how their families, their culture, and their environment influence and help to shape them. Observations that reflect the increasingly diverse population in contemporary early childhood classrooms and the imperative for teachers to widen their lens in order to meet the needs of young children with a range of developmental capacities, abilities, and behaviours. *Taking Running Records* Mary Shea, 2000. A teacher shares her experience on how to take running records and use what they tell you to assess and improve every child's reading. *Infant and Toddler Experiences* Fran Hast, Ann Hollyfield, 2002-06-10. What's the difference between an activity and an experience? One is meant to pass the time; the other to last a lifetime. Make the most of your interactions with young children with experiences that allow infants and toddlers to figure out how something works on their own. This book describes a process of learning that involves repeated interaction with and exploration of a caring environment which builds trust between children and you. Each experience offers children the chance to choose their own approaches to tasks that promote their development. Focusing on the Three Cs: curiosity, connection, and coordination, each experience is described simply and includes a list of materials that are needed and tips to keep in mind. In addition, each experience includes specific strategies to help you promote the healthiest development in infants and toddlers.
