

RUSH Caring for Caregivers

Caring for Caregivers aims to support family or friends that are providing care for adults 60 and older. Focusing on What Matters to the caregiver, we assist in developing a plan for the caregivers' health and well-being that incorporates the care needs of the older adult.

1. **Skill Building Meetings** can include occupational therapists, nurses, pharmacists, or nutritionists in teaching skills to caregivers, such as transferring patients without injuring themselves or performing basic medical care.
2. **Planning for What Matters Sessions** with our social worker to discuss what matters most to both caregiver and care recipient and develop health and life plans that reflect your preferences.
3. **Care Team Planning Meetings** involve learning to create and work with care teams most effectively, focusing on communicating effectively and ensuring that older adults and their caregivers are included in planning for care.

Initial session is provided at no cost. Additional services are covered by most insurances. Support for Rush Caring for Caregivers is made available through a generous grant from the RRF Foundation for Aging.

Clinical Alzheimer Rehabilitation Prem P. Gogia, Nirek Rastogi, 2008-08-15. If knowledge and preparation are the best defense and offense for managing AD challenges, this book is an excellent way to obtain those tools. Shirley Sahrman, PT, PhD, FAPTA, from the Forward. Despite the increasing prevalence of Alzheimer's disease, AD current research remains limited, and AD is still one of the most mysterious diseases to date, even to health professionals. This up-to-date resource for AD clinicians and caregivers serves to demystify AD and dementia at large. This comprehensive and easy-to-read guidebook contains the latest research on dementia and AD in the elderly population, including the causes and risk factors of AD, diagnosis information and symptoms, and progressions of the disease. Significant emphasis is given to the physical, mental, and verbal rehabilitation challenges of patients with AD. Key Features: Outlines specific rehabilitation goals for the physical therapist, occupational therapist, speech language pathologist, and general caregiver. Includes chapters on prevention and treatment of AD, caring for AD patients within the home and long-term institutional care of AD. Provides guidelines on how to address rehabilitation challenges, including strength building to prevent falls, swallowing exercises to prevent malnutrition, and speech language skills to promote communication. With this book, Gogia and Rastogi set forth the necessary care-giving and diagnostic tools to address the ongoing challenge of caring for AD patients, tools that have been clinically proven to help arrest this devastating neurodegenerative disease.
