Sustainable Business Model Innovation David Young, Martin Reeves, 2023-10-24 Reimagining business models is a tall order for any management team and especially so in today's business landscape of continual disruptive change. Having examined hundreds of businesses over the course of their research, the BCG Henderson Institute has developed a systematic approach for reimagining business models for economic and social sustainability, creating new modes of differentiation and advantage, embedding societal value into products and services, managing new performance measures, and reshaping business ecosystems to support these initiatives. This book explores the why, what, and how of sustainable business model innovation. SBM I is a new method by which corporations can optimize for both business and social value using their core businesses to deliver the financial returns expected by their owners and in tandem to help society meet its most significant challenges. It details the SBM I innovation cycle, linking to value creation and scaled transformation, and expands the application of SBM I to sustainable business ecosystems and corporate lead sustainability alliances. Sustainable Business Model Innovation offers inspiration and guidance to create more competitive and sustainable companies. Your company's future, our environment, and society depend on doing so.
