Egger, J. John Taber, 2018-12-13 Interdisciplinary Teaching about the Earth and Environment for a Sustainable Future presents the outcomes of the InTeGrate project a community effort funded by the National Science Foundation to improve Earth literacy and build a workforce prepared to tackle environmental and resource issues The InTeGrate community is built around the shared goal of supporting interdisciplinary learning about Earth across the undergraduate curriculum focusing on the grand challenges facing society and the important role that the geosciences play in addressing these grand challenges The chapters in this book explicitly illustrate the intimate relationship between geoscience and sustainability that is often opaque to students The authors of these chapters are faculty members administrators program directors and researchers from institutions across the country who have collectively envisioned implemented and evaluated effective change in their classrooms programs institutions and beyond This book provides guidance to anyone interested in implementing change on scales ranging from a single course to an entire program by infusing sustainability across the curriculum broadening access to Earth and environmental sciences and assessing the impacts of those changes Confronting Environmental Change in East and Southeast Asia Paul G. Harris, 2024-11-01 This is clearly a book with great breadth and diversity a valuable addition to the literature about east and southeast Asia T Forsyth Development Studies Institute London School of Economics and Political Science in Land Degradation and Development As their economies and populations expand almost all Asian countries are experiencing profound ecological problems at the national regional and global level be it air pollution in rapidly growing cities trans boundary water pollution or climate change While the countries of East and Southeast Asia are the victims of environmental change they are also complicit in causing it at home and abroad As these countries move towards international environmental cooperation a central issue becomes the vital connection between foreign policy and environmental problems Foreign policy is about pursuing and promoting national interests however it is not always clear what a country's national interests are or ought to be particularly with regard to complex international ecological issues On top of this it is almost always debatable how best to promote them Confronting Environmental Change in East and Southeast Asia is a collection of concise hard hitting essays by a group of international experts and scholars that address these complex issues The book takes foreign policy considerations into account in its analyses of how states and other actors in East and Southeast Asia confront environmental change through international cooperation and environmentally sustainable development The first part of the book examines many of the actors institutions and forces shaping environmental diplomacy and foreign policy in East Asia with a focus on China and Japan The second part of the book takes a deeper look at the relationships between ecological politics international relations and environmentally sustainable development in East and Southeast Asia Several chapters in the second part focus on how

environmental foreign policies impact countries in the region as they endeavour to implement environmentally sustainable development Together the analysis and case studies in this volume illuminate how environmental change is confronted or not in East and Southeast Asia with a host of important insights for researchers governments policy makers conservationists and business people dealing with the profound environmental problems facing the region The Course Reflection Project Nicole Schonemann, Emily Metzgar, Andrew Libby, 2015-05-01 Service learning is entering a post initiatory phase At tertiary institutions of all types and sizes service learning programs are common and service learning requirements for graduation are growing in popularity Taken together alongside continued faculty interest in effective teaching these factors have raised the visibility and popularity of service learning Now the greater need in service learning is not to prove the need for or efficacy of service learning but to turn the focus squarely back on practice Following established best practice is not enough instructors also need to reflect on how this fits within the specific context and application of each unique course and service learning partnership While there are many excellent resources that detail best practice and showcase exemplary service learning courses faculty reflection and course revision often goes unmentioned In response to the lack of attention on the role of reflection and course revision we convened groups of faculty from a variety of disciplines to reflect deeply on their courses paying specific attention to obstacles and challenges These conversations were converted to articles for this edited collection each chapter representing the process of reflection and revision and serving as a guide to develop effective practice in varied curricular contexts This text contributes to the body of literature on service learning in a unique and practical manner Faculty teaching or interested in teaching service learning classes would benefit from this text as well as university administrators and community service directors involved in service learning at a programmatic and institutional level This book should be marketed to faculty teaching disciplinary service learning classes and service learning pedagogy classes and administrative offices involved in service learning This could be a supplementary text for graduate level pedagogy courses Higher education institutional libraries would benefit from this text as well as the national and state campus compact offices Teacher Interview Questions and Answers - English Navneet Singh, Here are some common teacher interview questions along with suggested answers that highlight key qualities and skills important for teaching roles 1 Why did you decide to become a teacher Answer I decided to become a teacher because I have a passion for education and a strong desire to make a positive impact on students lives I believe that teaching is one of the most meaningful professions as it allows me to inspire and empower the next generation I enjoy helping students discover their strengths overcome challenges and achieve their full potential 2 What is your teaching philosophy Answer My teaching philosophy centres around student cantered learning I believe in creating an inclusive and engaging classroom environment where all students feel valued and motivated to learn I strive to use a variety of teaching methods to cater to different learning styles and to encourage critical thinking collaboration and creativity My goal is to foster a love for learning and to equip students with the

skills they need to succeed both academically and in life 3 How do you handle classroom management Answer I handle classroom management by establishing clear expectations and consistent routines from the beginning of the school year I believe in proactive strategies such as building strong relationships with students creating an engaging curriculum and using positive reinforcement to encourage good behaviour When issues arise I address them promptly and fairly always aiming to understand the underlying causes and to find constructive solutions that help students learn from their mistakes 4 How do you differentiate instruction to meet the needs of diverse learners Answer I differentiate instruction by assessing the individual needs strengths and interests of my students I use a variety of instructional strategies such as flexible grouping tiered assignments and personalized learning plans I also incorporate technology and hands on activities to provide multiple means of engagement Regular formative assessments help me monitor progress and adjust my teaching methods to ensure that all students are challenged and supported appropriately 5 How do you incorporate technology into your teaching Answer I incorporate technology into my teaching by using it as a tool to enhance learning and engagement This includes using interactive whiteboards educational apps and online resources to create dynamic lessons I also encourage students to use technology for research collaboration and presentations Additionally I integrate technology to provide personalized learning experiences and to facilitate communication with students and parents 6 Can you provide an example of a successful lesson you have taught Answer One of my most successful lessons was a project based learning unit on environmental science Students were tasked with researching local environmental issues and developing solutions They worked in groups to gather data create presentations and propose action plans This lesson was successful because it was highly engaging encouraged critical thinking and collaboration and allowed students to see the real world impact of their work Many students expressed a greater interest in science and environmental issues after the project 7 How do you assess student progress Answer I assess student progress using a variety of methods including formative and summative assessments Formative assessments such as quizzes exit tickets and classroom discussions help me gauge understanding and adjust instruction as needed Summative assessments like tests projects and presentations evaluate overall learning and mastery of content I also use rubrics and self assessment tools to involve students in the evaluation process and to provide clear criteria for success Regular feedback is essential to help students understand their progress and areas for improvement 8 How do you engage parents in their child s education Answer I engage parents by maintaining open and regular communication through emails newsletters and parent teacher conferences I also use online platforms where parents can access updates on their child's progress assignments and classroom activities I encourage parents to participate in school events and to volunteer in the classroom Building a strong partnership with parents helps create a supportive learning environment and ensures that students receive consistent encouragement both at school and at home 9 How do you stay current with educational best practices and professional development Answer I stay current with educational best practices by attending workshops conferences and webinars I also

participate in professional learning communities where I collaborate with colleagues to share ideas and strategies I subscribe to educational journals and follow relevant blogs and social media groups to keep up with the latest research and trends Additionally I continually reflect on my teaching practices and seek feedback to identify areas for growth and improvement 10 How do you handle a student who is consistently disruptive in class Answer When dealing with a consistently disruptive student I first seek to understand the root cause of the behaviour I meet with the student privately to discuss their behaviour and to set clear expectations for improvement I also work with parents counsellors and other support staff to develop a plan that addresses the student's needs In the classroom I use positive reinforcement and provide opportunities for the student to take on responsibilities that channel their energy positively Consistent and fair consequences for disruptive behaviour are also important to maintain a productive learning environment These questions and answers can help you prepare for a teaching interview by providing a framework for how to articulate your experiences philosophy and strategies in a professional and thoughtful manner A Guide to Teaching in the Active Learning Classroom Paul Baepler, J. D. Walker, D. Christopher Brooks, Kem Saichaie, Christina I. Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning they present many new challenges to faculty because among other things they eliminate the room s central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed The importance of learning how to use these classrooms well and to capitalize on their special features is paramount The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls This book provides an introduction to ALCs briefly covering their history and then synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces
