

RULE OF LAW

Law exists in a society for the purpose of regulating a civilization. It provides a binding framework to any society, for the resolution of their conflicts and help in maintaining harmony.

Rule of Law, can be interpreted in two ways: Political or philosophical but its meaning is not precise as supported by D.M. Walker. Rule of law is subjective and has more than one definition. It may mean different things to different people at different times. Rule of law can be traced back to time of Socrates, Cicero, Plato & Aristotle (philosophical view). For liberalists it means freedom for all under the law while for Marxists theorists like EP Thomson it means law represents interests of the powerful (political view).

Acceptance of a certain form of rule of law has varied nation to nation. For example, in Marxist States such as North Korea, people have been living peacefully under the 3 generation rule of the Kim family, which is nothing less than a form of dictatorship. People have accepted the government there and they believe 'rule of law' exists.

Even S 1 of the Constitutional Reform Act 2005 does not define what rule of law exactly is. For many theorists the definition is that any executive, public official or any person with authority may exercise its powers only if authorized by law. That law should not only legitimize use of power but also protect rights of the people.

Modern liberal democracies that have had a break from the past require something more than just the bare minimum form of rule of law. Believers of democracy want the 'law and government' to exhibit greater qualities. What those qualities should be has been argued by many theorists. Theorists such as Lord Bingham and Joseph Raz focus on qualities of law such as: equality before the law; clarity, stability and preciseness; independence of the judiciary and insurance of optimal performance of the judiciary. The focus seems to be on proper procedure of law, which has also been supported by the courts. (Merkey v. Loughton) (Sussex Justices, Ex parte McCarthy) (Ridge v. Baldwin)

Foundations of Public Law Martin Loughlin, 2012-09-27 Foundations of Public Law offers an account of the formation of the discipline of public law with a view to identifying its essential character explaining its particular modes of operation and specifying its unique task Building on the framework first outlined in The Idea of Public Law OUP 2003 the book conceives public law broadly as a type of law that comes into existence as a consequence of the secularization rationalization and positivization of the medieval idea of fundamental law Formed as a result of the changes that give birth to the modern state public law establishes the authority and legitimacy of modern governmental ordering Public law today is a universal phenomenon but its origins are European Part I of the book examines the conditions of its formation showing how much the concept borrowed from the refined debates of medieval jurists Part II then examines the nature of public law Drawing on a line of juristic inquiry that developed from the late sixteenth to the early nineteenth centuries extending from Bodin Althusius Lipsius Grotius Hobbes Spinoza Locke and Pufendorf to the later works of Montesquieu Rousseau Kant Fichte Smith and Hegel it presents an account of public law as a special type of political reason The remaining three Parts unpack the core elements of this concept state constitution and government By taking this broad approach to the subject Professor Loughlin shows how rather than being viewed as a limitation on power law is better conceived as a means by which public power is generated And by explaining the way that these core elements of state constitution and government were shaped respectively by the technological bourgeois and disciplinary revolutions of the sixteenth century through to the nineteenth century he reveals a concept of public law of considerable ambiguity complexity and resilience
