in wonder Ian Sansom The Guardian UK *Transmedium* Garrett Stewart, 2018-01-26 If you attend a contemporary art exhibition today you're unlikely to see much traditional painting or sculpture. Indeed, artists today are preoccupied with what happens when you leave behind assumptions about particular media such as painting or woodcuts and instead focus on collisions between them and the new forms and ideas that those collisions generate. Garrett Stewart in *Transmedium* dubs this new approach Conceptualism 2.0, an allusion in part to the computer images that are so often addressed by these works. A successor to 1960s Conceptualism which posited that a material medium was unnecessary to the making of art, Conceptualism 2.0 features artworks that are transmedial that place the aesthetic experience itself deliberately at the boundary between often incommensurable media. The result Stewart shows is art whose forced convergences break open new possibilities that are wholly surprising, intellectually enlightening and often uncanny.

[Forever Girls](#) Jinhee Choi, 2025-02-28 *Forever Girls* explores girlhood and the image of death manifest in contemporary South Korean cinema where girls' bodies have repeatedly embodied various conflicting socio-political forces that shaped the nation. With the depiction of girlhood from the 1970s as a reference image, Jinhee Choi examines the extent to which the girlhood represented in millennial South Korean cinema still resonates with such an image, ultimately arguing that South Korean cinema needs to more adequately mourn girls' deaths and grant them the very girlhood that has long been denied.

Entertained or Else Tina Kendall, 2025-09-18 This book considers the complex and often contradictory relations that are forged between boredom and everyday media use in the twenty-first century and demonstrates how networked media have developed new technical means of capitalizing on boredom's state of suspension to make it into a source of value creation. Focusing on the discursive technological and affective structures that encourage users to be entertaining and to remain entertained, the book analyses how boredom has been increasingly instrumentalized as both an individual mood and a wider structure of feeling that drives participation across media networks. It identifies the range of

cultural techniques for codifying classifying sensing and pre-empting boredom as well as those that teach users counter-intuitively to embrace boring media as a means of coping with the intensities of always-on existence. However, if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds, it is important to ask how else it might operate. While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism, this book attempts to think about the potential that might still be embedded in boredom's capacity to temporarily suspend or to neutralize dominant structures of attention and affect. Building on the work of Giorgio Agamben, Byung-Chul Han, Roland Barthes, and from historical accounts of boredom and entertainment, the book provides a new understanding of boredom in the context of networked media. *Ephemeral Media* Paul Grainge, 2017-10-20. *Ephemeral Media* explores the practices, strategies, and textual forms helping producers negotiate a fast-paced mediascape. Examining dynamics of brevity and evanescence in the television and new media environment, this book provides a new perspective on the transitory and transitional nature of screen culture in the early twenty-first century.

EU Copyright Law Morten Rosenmeier, Kacper Szkalej, Sanna Wolk, 2019-03-25. *EU Copyright Law: Subsistence, Exploitation, and Protection of Rights* Morten Rosenmeier, Kacper Szkalej, and Sanna Wolk. Against a background in which technology continues to change the ways we create, use, distribute, and consume cultural content, and where there has been a noticeable increase in the body of case law of the Court of Justice of the European Union (CJEU) relating to copyright, copyright protection has become an essential component of the knowledge-based economy and the information society. This book, structured around the various rights and issues rather than the legislative instruments, greatly facilitates an understanding of the complex legal area of European Union (EU) copyright law and provides for a more conscious application of these rules. Among the issues and topics covered are the following: the CJEU's interpretation of EU copyright law and application of fundamental rights; authorship and ownership of copyright; protection of computer programs and databases; scope of exclusive rights such as communication to the public and distribution, including rental and lending; application of limitations and exceptions; cross-border access to online content services; digital exhaustion of copyright; and enforcement of copyright and cross-border issues. With its practical approach to the substance of the various legal rules and principles, both at EU level and in the various EU Member States, the book clearly describes in detail how copyright law functions throughout the EU. Professionals, business entities, and academics who must be familiar with this dynamic legal area, especially in the digital environment, will benefit greatly from the book's clear consideration of legal questions that arise in connection with copyright issues. *The New Domestic Automakers in the United States and Canada* A.J. Jacobs, 2015-12-16. Over the past forty years, state, provincial, and local governments in the United States and Canada have provided foreign automakers with approximately 4.80 billion in incentives in order to lure light vehicles assembly plants to their areas. foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide
