

Remote Control

The Nova remote control is straightforward, easy to use, and elegantly designed. We suggest that after you manually turn the Nova "on", that standby be your default position when the Nova is not in use. It will not damage the unit or wear the parts out more quickly than being completely "off".

- 1) **On/Standby:** This button switches between "standby" and "On". When in standby the Nova draws very little voltage. We recommend turning the Nova off by leaving it in standby.
- 2) **USB:** This button selects a digital audio source at the USB connection.
- 3) **Volume + - :** These buttons will increase and decrease volume levels.
- 4) **Coax 1 & 2:** These buttons select digital audio source at the Coaxial digital connection.
- 5) **Opt 1 & 2:** These buttons select digital audio source at the Optical (or Toslink) connection.
- 6) **Mute:** This button will mute the Nova.
- 7) **Aux 1, 2, and 3:** These are your three standard line level inputs. See Back Panel page for an explanation of the Home Theater types.
- 8) **Tube:** When engaged, this button will bypass the tube in the preamp circuit showing for Solid State performance. Blue LED indicates the tube circuit is engaged.
