The Cambridge Yearbook and Directory, 1906 *Defence and Discovery* Andrew B. Godefroy, 2011-04-01 The Cold War space race between the United States and the Soviet Union is well documented but few are aware of Canada's early activities in this important arena of global power *Defence and Discovery* represents the first comprehensive investigation into the origins development and impact of Canada's space program from 1945 to 1974 Meticulously researched it demonstrates the central role of the military in Canada's early space research illuminating a significant yet understudied period in Canada's growth as a nation **The Place of Ethics in Science Education** Amanda McCrory, Michael J. Reiss, 2023-08-24 Science education particularly school science education has long had an uneasy relationship with ethics being unsure whether to embrace ethics or leave it to others In this book the authors argue that while the methods of science and of ethics are very different ethics plays a key role in how science is undertaken and used And so ethics has a central place in science education whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet books magazines TV and radio or in places such as hospitals and zoos Written for science educators based in schools and elsewhere the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have Empowered with the knowledge shared in this book readers will feel confident about the place that ethics has in science education The authors provide a rich array of examples as to how science education both in school and out of school and for all ages can be enhanced through including teaching about ethics *Linguistic Turns, 1890-1950* Ken Hirschkop, 2019-04-04 *Linguistic Turns* rewrites the intellectual and cultural history of early twentieth century Europe In chapters that study the work of Saussure Russell Wittgenstein Bakhtin Benjamin Cassirer Shklovskii the Russian Futurists Ogden and Richards Sorel Gramsci and others it shows how European intellectuals came to invest language with extraordinary force at a time when the social and political order of the continent was itself in question By examining linguistic turns in concert rather than in isolation the volume changes the way we see them no longer simply as moves in individual disciplines but as elements of a larger constellation held together by common concerns and anxieties In a series of detailed readings the volume reveals how each linguistic turn invested language as such with powers that could redeem not just individual disciplines but Europe itself It shows how in the hands of different writers language becomes a model of social and political order a tool guaranteeing analytical precision a vehicle of dynamic change a storehouse of mythical collective energy a template for civil society and an image of justice itself By detailing the force linguistic turns attribute to language and the way in which they contrast language as such with actual language the volume dissects the investments made in words and sentences and the visions behind them The constellation of linguistic turns is explored as an intellectual event in its own right and as the pursuit of social theory by other means *Objectivity* Lorraine Daston, Peter L. Galison, 2021-02-02 *Objectivity* has a history and it is full of surprises In *Objectivity* Lorraine Daston and

Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight Objectivity is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically [Introduction to Criminal Justice](#) Brian K. Payne, Willard M. Oliver, Nancy E. Marion, 2017-11-27 Introduction to Criminal Justice Second Edition provides you with balanced comprehensive and up to date coverage of all aspects of the criminal justice system Authors Brian K Payne Willard M Oliver and Nancy E Marion cover criminal justice from a student centered perspective by identifying the key issues confronting today s criminal justice professionals You are presented with objective research driven material through an accessible and concise writing style that makes the content easier to comprehend By exploring criminal justice from a broad and balanced perspective you will understand how decision making is critical to the criminal justice process and your future career The fully updated Second Edition has been completely revised to include new studies and current examples that are relatable to today s students Two new feature boxes have been added to this edition to help you comprehend and apply the content You Have the Right to gives insight into several Constitutional amendments and their relationship with criminal justice today and Politics and Criminal Justice explores current political hot topics surrounding the justice system and the debates that occur on both sides of the political aisle [Pearson's Magazine](#) ,1911 Vol 49 no 9 Sept 1922 accompanied by a separately paged section entitled ERA electronic reactions of Abrams **The English Catalogue of Books** Sampson Low, 1906 Volumes for 1898 1968 include a directory of publishers **Decolonizing Place in Early Childhood Education** Fikile Nxumalo, 2019-05-23 This book draws attention to the urgent need for early childhood education to critically encounter and pedagogically respond to the entanglements of environmentally damaged places anti blackness and settler colonial

legacies Drawing from the author's multi year participatory action research with educators and children in suburban settings the book highlights Indigenous presences and land relations within ongoing settler colonialism as necessary yet often ignored aspects of environmental education Chapters discuss topics such as geotheorizing in a capitalist society absences of Black place relations and unsettling unquestioned Western assumptions about nature education Rather than offer prescriptive solutions this book works to broaden possibilities and bolster the conversation among teachers and scholars concerned with early years environmental education

International Handbook of Research on Environmental Education Robert B. Stevenson, Robert Stevenson, 2013 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed

Urban Events, Place Branding and Promotion Waldemar Cudny, 2019-10-01 Urban Events Place Branding and Promotion explores the phenomenon of place event marketing examining the ways in which events are used to brand and disseminate information about a place It provides a novel contribution to the literature capturing the growing interest in place promotion and offers in depth insights on the role of events With a focus on urban locations this book defines the scope and concept of place event marketing It demonstrates that different kinds of events for leisure and business can be used to successfully develop promote and brand different types of places Individual chapters written by a variety of leading academics explore how various public and non governmental institutions that deal with promotion and marketing communications of places can implement event

marketing activities and how such institutions organize co organize and sponsor different events The effects of event marketing activities on urban place promotion and branding are thoroughly explored through a variety of international empirical case studies This will be of great interest to upper level students and researchers in events marketing and management tourism and the broader field of urban geography The concluding chapter also proposes future research directions

Planning Urban Places Mary Ganis, 2015-06-19 Urban change is often difficult because we are dealing with people's elusive notions of place and perception time and change Urban design and planning in a changing urban context so that it remains relevant for people is elusive because the idea of place is embedded in memory and identity but whose memory and whose identity This book seeks to understand the urban change dynamic so that the planning of urban places aligns with the dynamic of people's perception of place Planning Urban Places examines the premise that building cities is a concrete business surrounded by a shifting context It discusses the notion of urban design and placemaking from the perspective of place perception and cognitive psychology place philosophy and human geography It also considers network theory to help illustrate the self organising paradigm of small world network theory for planning urban places
