

Chapter 39**Endocrine and Reproductive Systems****Section 39–1 The Endocrine System** (pages 997–1002)

This section describes the function of the endocrine system and explains how it maintains homeostasis.

Introduction (page 997)

1. What makes up the endocrine system? The endocrine system is made up of glands that release their products into the bloodstream.
2. What do the products of the endocrine system do? They broadcast messages throughout the body.

Hormones (page 997)

3. Chemicals that travel through the bloodstream and affect the activities of other cells are called hormones.
4. How do hormones affect the activities of other cells? Hormones bind to specific chemical receptors on other cells.
5. Cells that have receptors for a particular hormone are referred to as target cells.
6. Is the following sentence true or false? Cells without receptors are not affected by hormones. true
7. Is the following sentence true or false? Generally, the body's responses to hormones are quicker and shorter lasting than the responses to nerve impulses. false

Glands (page 998)

8. An organ that produces and releases a substance, or a secretion, is called a(an) gland.
9. Complete the Venn diagram by adding titles.

10. What is the function of the parathyroid glands? Their function is to regulate the level of calcium in the blood.

McPhillips**

Pearson Chapter Review Endocrine System And Reproduction:

Hormones and Reproduction of Vertebrates David O. Norris, Kristin H. Lopez, 2010-11-25 This series of volumes represents a comprehensive and integrated treatment of reproduction in vertebrates from fishes of all sorts through mammals. It is designed to provide a readable coordinated description of reproductive basics in each group of vertebrates as well as an introduction to the latest trends in reproductive research and our understanding of reproductive events. Whereas each chapter and each volume is intended to stand alone as a review of that topic or vertebrate group respectively, the volumes are prepared so as to provide a thorough topical treatment across the vertebrates. Terminology has been standardized across the volumes to reduce confusion where multiple names exist in the literature and a comprehensive glossary of these terms and their alternative names is provided. A complete essential and up to date reference for research scientists working on vertebrate hormones and reproduction and on animals as models in human reproductive research. Covers the endocrinology, neuroendocrinology, physiology, behaviour and anatomy of vertebrate reproduction. Structured coverage of the major themes for all five vertebrate groups allows a consistent treatment for all. Special chapters elaborate on features specific to individual vertebrate groups and to comparative aspects, similarities and differences between them.

The Pearson General Studies Manual 2009, 1/e Showick Thorpe, Edgar Thorpe, 2009 This latest edition of The Pearson General Studies Manual continues to provide exhaustive study material for the General Studies paper of the UPSC Civil Services Preliminary Examination. This student friendly book has been completely revised, thoroughly updated and carefully streamlined and is strictly exam centric.
