Mechanisms of Reactions of Metal Complexes in Solution Debabrata Banerjee, M K Bharty, 2022-09-21 Reaction

Mechanisms of Metal Complexes in Solution provides a comprehensive overview of an often overlooked research area. Despite its importance and recent reshaping of the field, many inorganic chemists have lost an appreciation for the significance of stability constants and the thermodynamic aspects of complex formation. Ideal for newcomers and established researchers in the field, this book is a complete treatment of the area covering advanced topics with relevance to biomedical applications, extraction, metallurgy, food chemistry, and a wealth of other industrial processes and research areas. The book will be of particular interest to postgraduates with an interest in coordination chemistry, catalysis, supramolecular chemistry, metallobiology, and related aspects of biochemistry.

Stoichiometry and Research Alessio Innocenti, 2012-03-07. The aim of this book is to provide an overview of the importance of stoichiometry in the biomedical field. It proposes a collection of selected research articles and reviews which provide up-to-date information related to stoichiometry at various levels. The first section deals with host-guest chemistry, focusing on selected calixarenes, cyclodextrins, and crown ethers derivatives. In the second and third sections, the book presents some issues concerning stoichiometry of metal complexes and lipids and polymers architecture. The fourth section aims to clarify the role of stoichiometry in the determination of protein interactions, while in the fifth section, some selected experimental techniques applied to specific systems are introduced. The last section of the book is an attempt at showing some interesting connections between biomedicine and the environment, introducing the concept of biological stoichiometry. On this basis, the present volume would definitely be an ideal source of scientific information to researchers and scientists involved in biomedicine, biochemistry, and other areas involving stoichiometry evaluation.
