*Gifted?: The shift to enrichment, challenge and equity* Morgan Whitfield, 2024-07-19 Gifted and talented is a zombie. It is dead but still walking around. There are new labels to stratify students: more able, significantly able, high aptitude learners. New labels do not equal new thinking. The concept of gifted is still stubbornly embedded in our educational structures with its legacy of social immobility, racism, and sexism. Students can be more able when they have more financial resources, more access, more visibility, or more cultural acceptance. There are pervasive narratives that educators should prioritise extension for some students and not others. We can dispel the myth that pitching lessons judiciously to middle ability and then differentiating up and down is effective. This book explores how we can provide every student with rigorous challenge. Challenge for all is an inclusive approach to teaching whereby every student is invited and given the tools to reach a place of mastery. This can be through project-based learning, Harkness round tables, oracy, adaptive teaching, inclusive enrichment programs, dynamic classroom strategies, and a schoolwide mission for equity. Educators can embed powerful knowledge into the curriculum, reimagine teaching to the top, and stretch learners through personalised and responsive instruction. The shift to enrichment, challenge, and equity creates magnificent possibilities. The message to all students is: you belong here.

STEM Integration in K-12 Education National Research Council, National Academy of Engineering, Committee on Integrated STEM Education, 2014-02-28 STEM Integration in K-12 Education examines current efforts to connect the STEM disciplines in K-12 education. This report identifies and characterizes existing approaches to integrated STEM education both in formal and after and out of school settings. The report reviews the evidence for the impact of integrated approaches on various student outcomes and it proposes a set of priority research questions to advance the understanding of integrated STEM education. STEM Integration in K-12 Education proposes a framework to provide a common perspective and vocabulary for researchers, practitioners, and others to identify, discuss, and investigate specific integrated STEM initiatives within the K-12 education system of the United States. STEM Integration in K-12 Education makes recommendations for designers of integrated STEM experiences, assessment developers, and researchers to design and document effective integrated STEM education. This report will help to further their work and improve the chances that some forms of integrated STEM education will make a positive difference in student learning and interest and other valued outcomes. Mentoring in Action Carol Pelletier Radford, 2006 A guide to mentoring new teachers in a monthly format. *Special Education in Contemporary Society* Richard M. Gargiulo, 2014-07-09 Grounded in research and expanding on current trends and contemporary issues, the new edition of Gargiulo's text provides an easy-to-read introduction to special education. *Finding John Galt* Elizabeth Romey, 2013-08-01 This volume covers significant highlights in the history of gifted education, addressing significant contributors to the field, important political and policy concerns, and programs and practices of note. The book's scope is holistic, using Ayn Rand's concept of men and women of the mind to frame giftedness as a quality of individuals that

extends beyond the academic or schoolhouse setting and into a range of aspects of the lived human experience of gifted individuals

**Getting to the Common Core** Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Values of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
